The BLM finds the proposed perforations appropriate.

Subject: RE: [EXTERNAL] Perforation Request - Moore LS 7A - API 3004522826

Hi Kenny,

Yes it is our intention to perforate in that region. This region is within our NOI intervals, with the bottom of the Fruitland Coal at 3,067' and the top of the Pictured Cliffs at 3,068', down to 3,214'. This well has a DHC pending final approval to commingle the Fruitland Coal, Pictured Cliffs, and Mesaverde (existing formation), that we are expecting to receive today. Please let us know if you have any concerns or need to discuss further.

Thanks,

Tyler Portwood

Hello Tyler,

It appears there is poor cement coverage from 3000 to 3150. Is it still the intention to perforate in that region?

Kenny Rennick

Subject: [EXTERNAL] Perforation Request - Moore LS 7A - API 3004522826

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Good morning,

Please see the attached CBL for the Moore LS 7A (API 3004522826). This well passed its state witnessed MIT and we would like to request permission to perforate the Fruitland Coal interval from 2,590'-3,067' and the Pictured Cliffs interval from 3,068'-3,214'. Please also see the attached email regarding the change to the NOI top depth. We filed the revised NOI as directed and are awaiting official approval. Please let us know if we have permission to proceed with this work.

Thanks,

Tyler Portwood
