Procedure Description: Hilcorp Energy requests permission to revise the approved recompleat NOI to delay downhole commingling of the proposed Mancos formation with the existing Dakota. The Mancos will produce as a standalone for a length of time to allow us to better understand performance and reservoir parameters utilizing methods such as RTA which becomes difficult to implement in a commingled well. The DHC application will be approved before the Dakota isolation plug is drilled out and commingled with the Mancos.

Surface Disturbance

Is any additional surface disturbance proposed?: No

Cheryl-

You can delay the commingling application for this well. Please send in a NOI for this. Remember, production from this well can not be commingled until an approved DHC is approved.

Subject: Reid A 1E Recomplete (API 3004524805)

Ward,

Good afternoon. Hilcorp will be recompleting the subject well into the Basin Mancos formation on 6/12/2025. We would like to request permission to produce this well as a standalone Mancos section independently as the approved NOI is for Recomplete and commingle. This will allow us to better understand performance and reservoir parameters utilizing methods such as RTA which becomes difficult to implement in a commingled well. Once we have sufficiently characterized and understand the reservoir we will drill out the isolation plug and commingle with the Dakota.

Currently the DHC is pending and on the expedited list. However, we would like to proceed with the recomplete and leave the Dakota isolated and utilize the DHC at a later date. Please let me know if you have any questions or need anything for this request.

Thanks,

Cheryl Weston
