Date Sundry Submitted: 06/04/2025

Time Sundry Submitted: 07:57

Date proposed operation will begin: 07/16/2025

Procedure Description: OXY USA Inc. respectfully requests approval to perform a workover job on the subject TA'd wellbore to add perforations from 8048'-8125'M in the bone spring pool and produce this well. This well was originally permitted as a horizontal wellbore in sections 11 & 14 drilling in federal minerals. Due to issues during drilling, the decision was made to not drill the lateral portion of the well. The subject well is current drilled to 9842' in section 2, T25S R29E with a CIBP at 9332'. See the attached proposed plan, current and proposed wellbore diagram for reference. After performing this job, this well would produce as a non-federal wellbore.

CORRAL BLUFF 11-14 FEDERAL COM 31H**30-015-48021 – PROPOSED PROCEDURE WELLBORE DIAGRAM**

This well was originally planned as a horizontal well in sections 11 and 14 drilling federal minerals. During drilling, issues were encountered and the decision was made to not proceed with the lateral portion of the wellbore. This well is currently drilled (no federal minerals) in section 2, T25S, 29E as a vertical/directional to 9842' TD and is temporarily abandoned with a CIBP set at 9332' with cement on top.

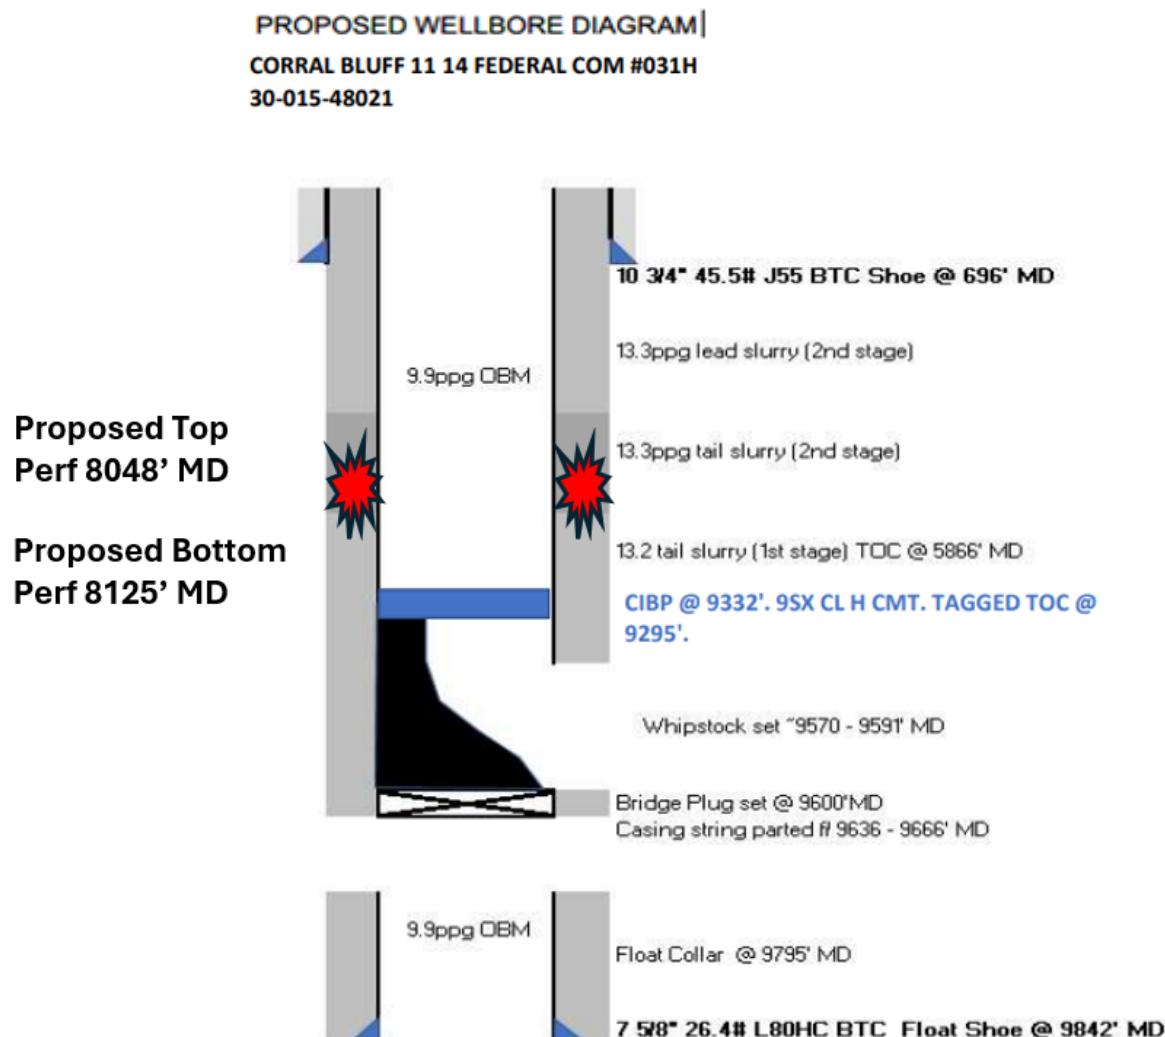

Planned Procedure:

1. MIRU. RIH and tag existing CIBP @ 9332'.
2. RIH and perforate in the bone spring pool from 8048' MD to 8125' MD.
3. Stimulate perfs with hydraulic fracturing (150Mlbs).
4. RDMO and turn to production.

Current wellbore diagram – well is currently TA'd.
