Notice of Intent

Sundry ID: 2879893

Type of Submission: Notice of Intent

Type of Action: Other

Date Sundry Submitted: 10/22/2025

Time Sundry Submitted: 02:18

Date proposed operation will begin: 11/15/2025

Procedure Description: The Bill Wilshusen 201H Well Pad (Site) at (Unit H, Section 22, Township 21S, Range 27E, 32.46782,-104.170200001) and the immediate area requires advanced soil boring to take place at approximately (51) feet below ground surface to remediate release (Incident Number nAPP2506233274). The boring will be secured and left open for (72) hours at which time Matador will assess for the presence or absence of groundwater. Temporary PVC well material will be placed to total depth of the boring and secured at the surface. If water is encountered at any point during the boring, installation of the soil boring will be plugged using Portland Type 1/11 neat cement less than 6.0 gallons of water per 94lb sack. If no water is encountered, then the soil boring will be plugged.

Surface Disturbance

Is any additional surface disturbance proposed?: No

To Whom It May Concern:

The above well location and the immediate area mentioned above requires advanced soil boring to take place at approximately 51 feet below ground surface. The boring will be secured and left open for 72 hours at which time MATADOR PRODUCTION COMPANY will assess for the presence or absence of groundwater. Temporary PVC well material will be placed to total depth of the boring and secured at the surface. If water is encountered at any point during the boring, installation of the soil boring will be plugged using Portland Type 1/11 neat cement less than 6.0 gallons of water per 94lb sack. If no water is encountered, then the soil boring will be plugged. The Bureau of Land Management (landowner) authorizes the access of the area to accomplish depth to groundwater determination of this site.

If you have any questions, contact Crisha Morgan, at 575-234-5987.
