Well was drilled and completed in 1981. Remained shut in due to its location far removed from developed portion of field unit mid 2009 when well was hooked up to the new collection system. The well continue to produce until mid 2014 when flowing pressure become to low to flow into existing collection system. In April 2015 well was disconnected and is being used as a reservoir pressure monitor. (SEE C-103 ON FILE)
