Describe the proposed program. If this application is to DEEPEN or PLUG BACK, give the data on the present productive zone and proposed new productive zone.  Describe the blowout prevention program, if any. Use additional sheets if necessary.												
1. Drill 11" hole to +/- 330' with air.												
2. Set 8 5/8" surface casing and cement to surface with 100 sks of cement.												
3. Drill 7 7/8" hole to 2,930' with air. Run open hole logs.												
4. Set 5 1/2" production casing to TD and cement to surface. Cement volumes calculated from open hole logs.												
5. Perforate and stimulate the Vermejo and/or Raton Coals. Clean out well bore and run production equipment.												
23 I hereby certify that the information given above is true and complete to the OIL CONSERVATION DIVISION												
best of my knowledge and belief. I further certify that the drilling pit will be												
constructed according to NMOCD guidelines
