ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

- [NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
- [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
- [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
- [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
- [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
- [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

- [1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]
- [A] Location - Spacing Unit - Simultaneous Dedication
 NSL NSP SD
- Check One Only for [B] or [C]
- [B] Commingling - Storage - Measurement
 DHC CTB PLC PC OLS OLM
- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
 WFX PMX SWD IPI EOR PPR
- [D] Other: Specify _____
- [2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or Does Not Apply
- [A] Working, Royalty or Overriding Royalty Interest Owners
- [B] Offset Operators, Leaseholders or Surface Owner
- [C] Application is One Which Requires Published Legal Notice
- [D] Notification and/or Concurrent Approval by BLM or SLO
 U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
- [E] For all of the above, Proof of Notification or Publication is Attached, and/or,
- [F] Waivers are Attached

[3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

 Print or Type Name Signature Title Date

 e-mail Address

APPLICATION FOR AUTHORIZATION TO INJECT

I. PURPOSE : _____ Secondary Recovery Pressure Maintenance _____ Disposal _____ Storage
Application qualifies for administrative approval? Yes _____ No

II. OPERATOR: ConocoPhillips

ADDRESS : 4001 Penbrook St., Odessa, TX 79762

CONTACT PARTY : Kay Maddox PHONE : (432)368-1368

III. WELL DATA: Complete the data required on the reverse side of this form for each well processed for injection.
Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? Yes _____ No
If yes, give the Division order number authorizing the project R-6856

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

*X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted.)

*XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the 'Proof of Notice' section on the reverse side of this form.

XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

NAME: Kay Maddox TITLE: Regulatory Agent

SIGNATURE:  DATE: 01/21/2005

E-MAIL ADDRESS: _____

* If the information required under Sections VI, VII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstance of the earlier submittal: Order #R-5897, Order #R-6856, Order #R-10020

Pmk 177

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate District Office

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, NM 87505 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below: EAST VAC GB SA UN INJ. 2851 2815-015

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

Phillips Petroleum Company

Santa Fe B-2224-

Well No. 15

in the

Company or Operator

Lease

NE/4 NE/4

of Sec. 28

T. 17-S

R. 55-E

N. M. P. M.

Vacuum

Field,

Lea

County

The dates of this work were as follows:

May 21, 1939 to May 24, 1939 inclusive.

Notice of intention to do the work was (crossed out) submitted on Form C-102 on April 25, 1939 and approval of the proposed plan was (crossed out) obtained. (Cross out incorrect words)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

T. D. 4700 Line. This well was plugged as follows: Ran 2" tubing to bottom & mixed 20 tons mud & filled hole. Cemented with 25 sacks cement on bottom. Pulled tubing up to 4300', and put in 30 sacks Trinity common cement. Laid down tubing & shot 7" casing at 5900', 5500', 5300' & 5000'. Casing was freed at 5000'. Pulled ~~28~~ 95 joints, 2868' 9" of 7" casing. Ran tubing to 1800', mixed 8 tons common clay & displaced water in hole with mud. Pulled tubing up to 1690' & cemented with 30 sacks Trinity common cement to approximately 1540'. Pulled tubing & filled hole to within 10' of top with heavy mud. Ran 10 sacks Trinity common cement & filled to surface. Put in 4" pipe marker & location was abandoned. No attempt was made to recover 9-5/8" casing which was cemented to bottom with 875 sacks.

Approved copy sent to Div 8-31-39

Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Re-enter and replug per following procedure:

1. Locate wellhead, clear off and MI unit to drill out cmt plugs. Extend 9-5/8" csg to ground level, install csg flange and BOP.
2. Drill out surf plug with 8-1/2" bit. Condition hole to top of 7" csg cut at 2400'. Pu 8-1/2" bit, GIH w/6-1/8" bit and run to top of plug at + 4150'. Drill cmt 4150-4200' a clean out to 4671'.
3. Run tbg open-ended and spot 100 sxs C1 "C" plug, 4000-4670'. Pull tbg to 3900' and circ mud-laden fluid.
4. Spot 25 sxs plug 2700-2800' (Base of salt).
5. Spot 35 sxs plug 50' above and 50' below 7" csg cut at 2400'.
6. Spot 80 sxs plug 1550-1750' (Top of salt) and into 9-5/8" csg.
7. Spot 30 sxs plug 300-400' in 9-5/8" csg.
8. Spot 30 sxs cmt from 100' to surf.
9. Weld plate over top of csg, set marker and clear location.

MISCELLANEOUS REPORTS ON WELLS

P-6120
5F

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL	X		

Hobbs, New Mexico
Place

11-19-47
Date

OIL CONSERVATION COMMISSION,
SANTA FE, NEW MEXICO.

EAST VAC GB. 6A UN NO. 2845037

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

Phillips Petroleum Company
Company or Operator

Santa Fe
Lease

Well No. 37

in the

SW/4

of Sec. 28

T. 17-S

R. 15-E

, N. M. P. M.,

Vacuna

Field,

Lea

County.

The dates of this work were as follows: 11-4-47 to 11-11-47

Notice of intention to do the work was (~~was not~~) submitted on Form C-102 on 10-8 19 47

and approval of the proposed plan was (~~was not~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

- 11-4-47 T.D. 4671' Cecil Penick, Contractor, moved in and rigged up to plug well.
- 11-5-47 Loaded hole with mud. Placed 20 sacks cement 4101'-4202'.
- 11-6-47 Lost cement plug 4101'-4202'. Placed 10 sacks cement 4150'-4200'.
- 11-7-47 Shot 7" casing at 2850', 2750', 2600', 2500', and 2400'. Pipe came loose at 2400'.
- 11-8-47 Pulling 7" casing. 11-9-47 Pulling 7" casing.
- 11-10-47 Completed pulling casing, total recovery 81 joints, 2414'.
- 11-11-47 Filled hole with heavy mud and filled top 10' in 9-5/8" casing with cement. Set 4" pipe marker in casing, well plug and abandoned.

OPERATOR	

New Well
Recompletion

This form shall be submitted by the operator before an initial allowable will be assigned to any completed Oil or Gas well. Form C-104 is to be submitted in QUADRUPLICATE to the same District Office to which Form C-101 was sent. The allowable will be assigned effective 7:00 A.M. on date of completion or recompletion, provided this form is filed during calendar month of completion or recompletion. The completion date shall be that date in the case of an oil well when new oil is delivered into the stock tanks. Gas must be reported on 15.025 psia at 60° Fahrenheit.

Hobbs, New Mexico November 10, 1964

WELL P&A'D

VII Data for Application to convert 3 wells (EVGSA # 2819-002, # 2801-009, # 2801-011) to Injection wells

1. Proposed average and maximum injection rate:

Water	Carbon Dioxide
Average: 1500 BWPD	3,000 MMSCFD
Maximum: 2200 BWPD	5,000 MMSCFD

2. Both systems are closed

3. Proposed average and maximum injection pressure:

Water	Carbon Dioxide
Average: 1000 PSIG	1500 PSIG
Maximum*: 1350 PSIG	1850 PSIG

* Maximum injection pressures are based on pre-existing Unit injection allowable which are based on actual San Andres fracture gradients

4. The source of injection water is San Andres produced water from ConocoPhillips operated east Vacuum Grayburg San Andres Unit. The two sources of Carbon dioxide are from reinjected produced gas and purchased gas line sales. The gas composition is approximately:

Carbon Dioxide	91%
Hydrogen Sulphide	2%
Nitrogen	2%
Hydrocarbon	5%

Carbon Dioxide has been injected into the San Andres formation since 1985 under the authority on NMOCD Order No. R6856 dated 12/16/1981.

Note 1: When assessing the severity of the scale problem, both the saturation index (SI) and amount of scale must be considered.
Note 2: Precipitation of each scale is considered separately. Total scale will be less than the sum of the amounts of the five scales.
Note 3: The reported CO2 pressure is actually the calculated CO2 fugacity. It is usually nearly the same as the CO2 partial pressure.

Note 1: When assessing the severity of the scale problem, both the saturation index (SI) and amount of scale must be considered.
Note 2: Precipitation of each scale is considered separately. Total scale will be less than the sum of the amounts of the five scales.
Note 3: The reported CO2 pressure is actually the calculated CO2 fugacity. It is usually nearly the same as the CO2 partial pressure.

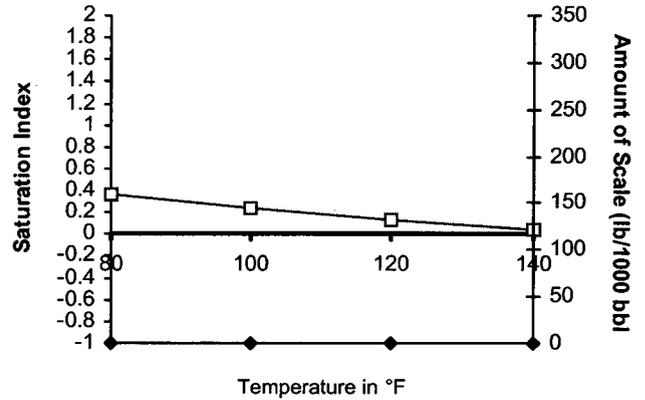

Scale Predictions from Baker Petrolite

Analysis of Sample 234622 @ 75 °F for CONOCO - PHILLIPS PETROLEUM CO, 12/9/04

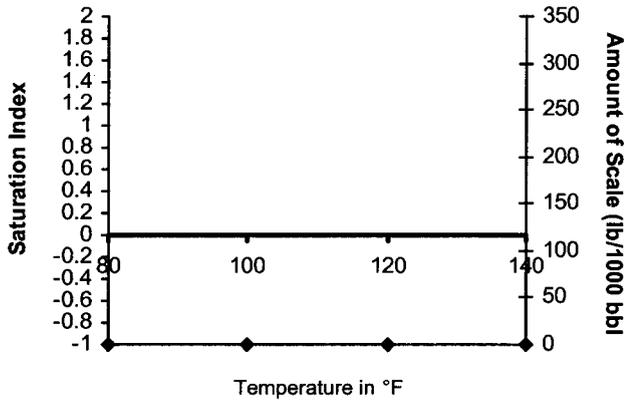

Calcite - CaCO₃

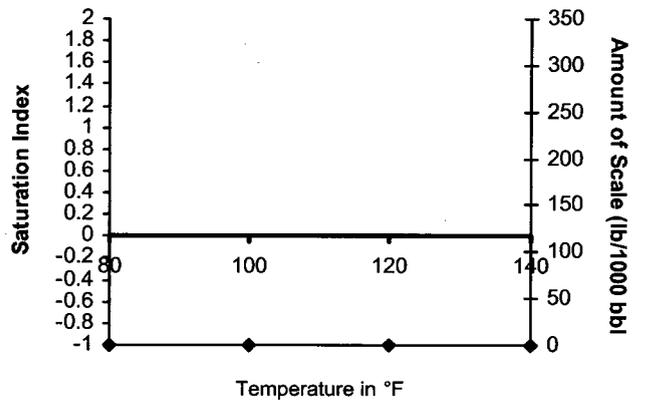

Barite - BaSO₄

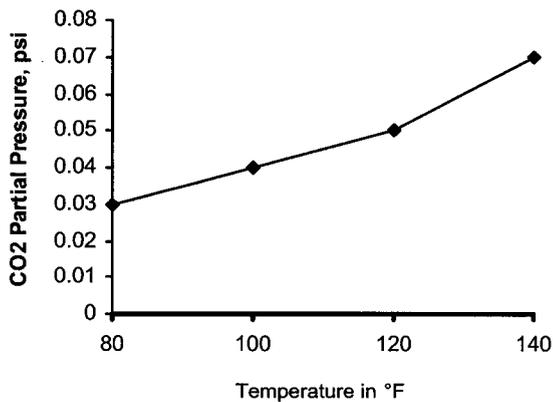

Gypsum - CaSO₄*2H₂O

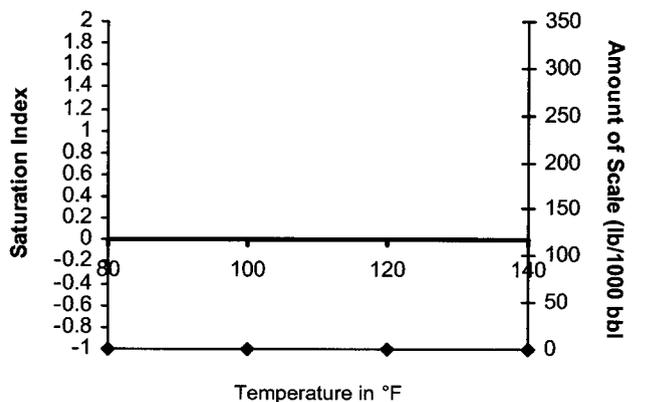

Anhydrite - CaSO₄

Carbon Dioxide Partial Pressure

Celestite - SrSO₄
