Greetings,

The New Mexico Oil Conservation Division District 2 Office (OCD) is in receipt of a document titled "Soil Assessment and Remediation Work Plan" (plan), dated June 23, 2011. The plan was formulated and presented to OCD by Devon Energy Production's agent, Talon, LPE. The plan proposes methods and procedures for remediation of a release of produced fluids, referenced above.

The plan is approved with the following conditions and/or stipulations:

- Notify OCD 48 hours prior to commencement of remedial activities.
- Notify OCD 48 hours prior to obtaining samples where the analyses are to be presented to OCD.
- Representative samples will be required to be obtained for analyses, from below the backfill material, in the area along the 0.25 mile two-track road that was initially excavated and backfilled by the operator.
- Confirmation sidewall samples may be required from excavated areas. Contact OCD prior to backfilling any excavations.
- Like approval by any other regulatory authority as may be applicable.
- Submit a Form C-141 Final Report and closure report upon satisfactory completion of project.
- Project is to be completed and closure documentation submitted to OCD not later than October 4, 2011.

Be advised, OCD approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notifications, please contact me.
