ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
 [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
 [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
 [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
 [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
 [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] TYPE OF APPLICATION - Check Those Which Apply for [A]

[A] Location - Spacing Unit - Simultaneous Dedication
☐ NSL ☐ NSP ☐ SD

Check One Only for [B] or [C]

[B] Commingling - Storage - Measurement
☒ DHC ☐ CTB ☐ PLC ☐ PC ☐ OLS ☐ OLM

[C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR

[D] Other: Specify _____

[2] NOTIFICATION REQUIRED TO: - Check Those Which Apply, or ☐ Does Not Apply

[A] ☒ Working, Royalty or Overriding Royalty Interest Owners

[B] ☐ Offset Operators, Leaseholders or Surface Owner

[C] ☐ Application is One Which Requires Published Legal Notice

[D] ☒ Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office

[E] ☒ For all of the above, Proof of Notification or Publication is Attached, and/or,

[F] ☐ Waivers are Attached

*-Attachment No. 4 presents copies of notification to interest owners - All sent certified in return Receipt. Upon receiving Receipts, copies will be provided.

[3] SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Re: Application to Downhole Commingle gas & water
Dugan Production's Federal I Com No. 103S
API No. 30-045-35348
Basin Fruitland Coal (71629) &
Harper Hill Fruitland Sand-Pictured Cliffs (78160)
SWSW Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Ms. Bailey & Mr. Evans,

We are writing to request your administrative approvals for the caption application. NMOCD form C-107A is attached. The subject well was completed on 10/31/13 with the Fruitland Coal perforated in four intervals 955' to 1087', the Fruitland Sand perforated in three intervals 978' to 1055' and the Pictured Cliffs perforated 1090'-1095'. The individual perforations are presented on Attachment No. 2. It is a common practice to complete these three intervals together since they are fairly close to each other, the fluids (gas and water) in each interval are compatible and each pool is anticipated to produce water that is more efficiently pumped as a commingled stream as opposed to installing dual sets of production equipment. With reference to Attachment No. 2, the Fruitland Sand and Fruitland Coal perforations are intermingled and the Pictured Cliffs perforations are only 3' below the lower most Fruitland Coal perforations, which will make it very difficult, if not impossible to produce the two pools separately.

Since there is not an established production history for the Federal I Com No. 103S, we are proposing that the commingled production be allocated using factors derived from average production data from the 35 wells that are within Section 12 and the adjacent eight sections (Sections 6, 7 & 18 of T-29N, & R-13W, plus Sections 1, 2, 11, 12, 13 & 14 of T-29N, R-14W). Attachment No. 1 presents the production data for 13 Fruitland Coal wells, 12 Fruitland Sand-Pictured Cliffs wells and 10 wells that are similarly downhole commingled. Also presented on Attachment No. 1 is the downhole commingling factors approved for the 10 wells that are currently downhole commingled. Based upon the average production data, the 23 Fruitland Coal wells (13 single and 10 DHC) average 75 mcf/d plus 38 BWPD per well and the 22 Fruitland Sand-Pictured Cliffs wells (12 single and 10 DHC) average 46 mcf/d plus 27 BWPD per well. Using these average production rates, our proposed allocation factors are:

	<u>Gas</u>	<u>Water</u>
Basin Fruitland Coal	62%	59%
Harper Hill Fruitland Sand-Pictured Cliffs	38%	41%

These proposed factors are within the range of the currently approved factors which are also presented on Attachment No. 1. Also presented on Attachment No. 1, we did verify the validity of our average production by excluding production data for the downhole commingled wells which did not significantly change the average production data. Only gas and water production is anticipated. Oil production does not occur in either pool and is not anticipated.

All interest ownership is either Federal or Fee. There are no Indian or State leases. It should be noted that the Federal royalty is approximately 50% of each spacing unit and that there are 47 Fee interest owners. We do not have complete address information for 17 of the Fee interest owners, however we have made a very exhaustive effort to locate the needed address information which includes an independent review of all Dugan Production records, plus pertinent records at the San Juan County Courthouse, the District Court, and San Juan Abstract & Title Co. To help provide the necessary notice, we did publish a notice in the Farmington Daily Times (Attachment No. 4) and to date have had no responses.

The proposed downhole commingling will allow both pools to be optimally produced and will maximize recoveries to all interest owners. Production from both pools is compatible and the proposed downhole commingling will not reduce recoveries from either pool.

Should you have questions or need additional information, please let me know.

Sincerely,

John D. Roe
Engineering Manager

ADDITIONAL DATA

Are all working, royalty and overriding royalty interests identical in all commingled zones? Yes No X
If not, have all working, royalty and overriding royalty interest owners been notified by certified mail? Yes X No
Are all produced fluids from all commingled zones compatible with each other? Yes X No
Will commingling decrease the value of production? Yes No X
If this well is on, or communitized with, state or federal lands, has either the Commissioner of Public Lands or the United States Bureau of Land Management been notified in writing of this application? Yes X No

NMOCD Reference Case No. applicable to this well:

- Attachments:
- C-102 for each zone to be commingled showing its spacing unit and acreage dedication. – Attachment No. 3
 - Production curve for each zone for at least one year. (If not available, attach explanation.) - Attachment No. 1
 - For zones with no production history, estimated production rates and supporting data. – Attachment No. 1
 - Data to support allocation method or formula. – Attachment No. 1
 - Notification list of working, royalty and overriding royalty interests for uncommon interest cases. – Attachment No. 4
 - Any additional statements, data or documents required to support commingling.

PRE-APPROVED POOLS

If application is to establish Pre-Approved Pools, the following additional information will be required:

- List of other orders approving downhole commingling within the proposed Pre-Approved Pools
- List of all operators within the proposed Pre-Approved Pools
- Proof that all operators within the proposed Pre-Approved Pools were provided notice of this application.
- Bottomhole pressure data.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

- ¹ - DPC - Dugan Production Corp.; ROC - Richardson Operating Co.; SOC - Synergy Operating, LLC; TEP - Thompson Engineering & Production Co.; XTO - XTO Energy Inc.
- ² - Production data from IHS Inc. through July 2013. If 7/13 data was questionable, average represents average for 7 months 2013. Fruitland Coal production from the Basin Fruitland Coal pool (71629) and Fruitland Sand-PC production from the Harper Hill (78160) and Twin Mounds (86620) Fruitland Sand-Pictured Cliffs pools, plus West Kutz Pictured Cliffs pool (78680)
- ³ - Downhole commingling factors for July 2013. % of total gas and water from Fruitland Coal and % of total gas and water from Fruitland Sand/Pictured Cliffs.
- ⁴ - Westland Park No. 1 (API No. 30-045-34749) - DHC-3493AZ approved 12/21/10, authorizes downhole commingling of Basin Fruitland Coal with West Kutz Pictured Cliffs using fixed allocation factors; for gas 43.3% to Fruitland Coal plus 56.7% to Pictured Cliffs; for water 40.1% to Fruitland Coal plus 59.9% to Pictured Cliffs.
- ⁵ - RPC 18 Well No. 3 (API No. 30-045-30943) - DHC-894AZ approved 9/10/02, authorizes downhole commingling of Basin Fruitland Coal with West Kutz Pictured Cliffs. Fixed allocation factor of 50/50 approved for gas & water.
- ⁶ - Federal I No. 101 (API No. 30-045-31785) - DHC-1947 approved on 7/25/05, authorizes downhole commingling Basin Fruitland Coal with Harper Hill Fruitland Sand-Pictured Cliffs using fixed allocation factors: for gas & water 53% to Fruitland Coal plus 47% to Fruitland Sand-PC.
- ⁷ - King Com No. 2 (API No. 30-045-31116) - DHC-1945AZ approved on 7/25/05, authorizes downhole commingling Basin Fruitland Coal with Harper Hill Fruitland Sand-Pictured Cliffs using fixed allocation factors: for gas & water 53% to Fruitland Coal plus 47% to Fruitland Sand-PC.
- ⁸ - Federal I No. 102 (API No. 30-045-31792) - DHC-1952AZ approved on 8/9/09, authorizes downhole commingling Basin Fruitland Coal with Harper Hill Fruitland Sand-Pictured Cliffs using fixed allocation factors: for gas & water 53% to Fruitland Coal plus 47% to Fruitland Sand-PC.
- ⁹ - Federal I Com No. 102S (API No. 30-045-35013) - DHC-3500AZ approved 1/14/11, authorizes downhole commingling of Basin Fruitland Coal with Harper Hill Fruitland Sand-Pictured Cliffs using fixed allocation factors for gas and water - 53% to Fruitland Coal & 47% to Fruitland Sand-PC.
- ¹⁰ - Navajo 13 Well No. 1 (API No. 30-045-30652) - DHC-965AZ approved 11/02, authorizes downhole commingling of Basin Fruitland Coal with West Kutz Pictured Cliffs. Fixed allocation factor of 49% Fruitland Coal and 51% Pictured Cliffs proposed and fixed allocation factor of 50/50 used for production 5/03 thru 9/04. On 11/15/04, Richardson Operating proposed new fixed allocation factors of 78.3% Fruitland Coal and 21.7% Pictured Cliffs which were used 10/04 thru current for gas.
- ¹¹ - Navajo 13 No. 2 (API No. 30-045-30653) - DHC-3677AZ approved 12/11/11, authorizes downhole commingling of Basin Fruitland Coal with West Kutz Pictured Cliffs using allocation factors for gas - 63% to Fruitland Coal & 37% to Pictured Cliffs; for water - 97% to Fruitland Coal & 3% to Pictured Cliffs.
- ¹² - Navajo Tribal H No. 5 (API No. 30-045-13101) - Administrative Order DHC-2478 dated 10/12/09, authorized downhole commingling of Basin Fruitland Coal with West Kutz Pictured Cliffs. Allocation factors to be based upon an exponential decline of 18%/year for the PC and by subtraction for the Fruitland Coal. An allocation factor of 50/50 was used for all gas and water production 5/00 thru 5/08. For production 6/08 thru 3/10 gas was allocated to the Fruitland Coal using factors ranging from 51 to 62% with factors for the PC ranging from 49 to 38%. For production 4/10 to current, gas & water allocated using 50% to Fruitland Coal and 50% to the PC.
- ¹³ - Benally 14 No. 3 (API No. 30-045-30522) - DHC-3084AZ approved by on 3/31/09, authorized downhole commingling of Basin Fruitland Coal with West Kutz Pictured Cliffs using fixed allocation factors: for gas - 54% to Fruitland Coal and 46% to Pictured Cliffs; for water 52% to Fruitland Coal and 48% to Pictured Cliffs.

Attachment No. 4
Interest Ownership Notification
Dugan Production Corp.'s Application dated 1/2/14
Federal I Com No. 103S
Downhole Commingle
Basin Fruitland Coal & Harper Hill Fruitland Sand-Pictured Cliffs
San Juan County, New Mexico

As evidence that all interest ownership in the subject well have been given notice of Dugan's application, attached is:

1. A copy of Dugan's transmittal letter dated 1/2/14 used to send copies of the subject application to all interest owners which includes three working interest owners in addition to Dugan Production plus 48 royalty interest owners (BLM plus 47 fee). Since the interest ownership in the two pools to be downhole commingled is not identical, all interest owners were provided a complete copy of our application. The letter was sent by certified mail with a return receipt requested. Upon receiving the receipt, a copy will be sent to the NMOCD.
2. Copy of the Affidavit of Publication for the legal ad published in the 11/24/13 issue of the Farmington Daily Times regarding the subject application. This publication was made in anticipation that of the notices mailed to interest owners, there will be at least one either returned for some reason or the return receipt will be lost in the mail. In addition, of the 47 Fee Royalty Interest Owners, we do not have good address information for 17 which have a combined interest ownership of 0.561026%. We have reviewed all information within Dugan Production's files plus pertinent records at the San Juan County Courthouse, the District Court, and San Juan Abstract & Title Co.

Interest Owners (address list attached)
Dugan Production Corp.'s
Federal I Com well No. 103S
API No. 30-045-35348
SWSW (Unit M), Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Interest Owners,

According to our records, you have an interest ownership (working or royalty) in the subject well and as such we are writing to advise that we are applying to the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM) for approvals to downhole commingle production from the Basin Fruitland Coal and the Harper Hill Fruitland Sand-Pictured Cliffs gas pools. This well was completed on 10/31/13 with the Fruitland Coal perforated in four intervals 955' to 1087', the Fruitland Sand perforated in three intervals 978' to 1055' and the Pictured Cliffs perforated 1090'-1095'. It is a common practice to complete these three intervals together since they are fairly close to each other, the fluids (gas and water) in each interval are compatible and each pool is anticipated to produce water that is more efficiently pumped as a commingled stream as opposed to installing dual sets of production equipment. We are proposing that the commingled production from all intervals be allocated 62% to the Basin Fruitland Coal gas pool which will have a W/2 spacing unit, and 38% to the Harper Hill Fruitland Sand-Pictured Cliffs gas pool which will have a SW/4 spacing unit. These allocation factors represent an average of the production from 35 wells (13 Fruitland Coal wells, 12 Fruitland Sand-Pictured Cliffs wells & 10 wells that are similarly downhole commingled) in Section 12 and the adjacent eight sections. Since the interest ownership in these two pools is not identical, we are sending you a complete copy of our application. Attachment No. 1 to our application presents the individual well data in support of our proposed allocation factors.

Should you have questions or need additional information, please let me know. I can be reached at the letterhead address and phone. Should you have an objection to the proposed downhole commingling, please let me know or you can contact the NMOCD directly at 1220 South St. Francis Drive, Santa Fe, NM 87505. I would appreciate being advised of your objection. Any objection you have should be given within 20 days from the date of this letter.

Sincerely,

John D. Roe
Engineering Manager

That HE is the PUBLISHER of THE DAILY
TIMES, a daily newspaper of general
circulation published in English at Farmington,
said county and state, and that the hereto
attached Legal Notice was published in a
regular and entire issue of the said DAILY
TIMES, a daily newspaper duly qualified for
the purpose within the meaning of Chapter
167 of the 1937 Session Laws of the State of
New Mexico for publication and appeared in
the Internet at The Daily Times web site on
the following day(s):

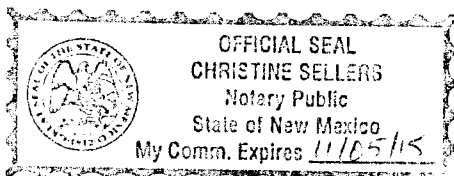

Sunday, November 24, 2013

And the cost of the publication is \$110.61

ON 11/24/13 JOHN ELCHERT
appeared before me, whom I know personally
to be the person who signed the above
document.

COPY OF PUBLICATION

Alter born f
No. 4
Pg 4 of 4

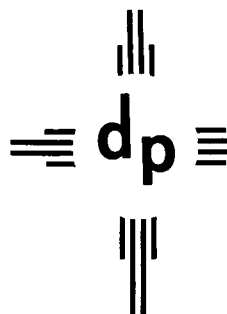

Dugan Production Corp is applying to the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM) for approvals to downhole commingle natural gas and water production from the Harper Hill Fruitland Sand-Pictured Cliffs (Pool No. 78160), and Basin Fruitland Coal (Pool No. 71629) gas pools within the wellbore of its Federal I Com No. 103S (API No. 30-045-35348) located in the SWSW (Unit M) of Section 12, Township 29N, Range 14W in San Juan County, New Mexico. The spacing unit for the Harper Hill Fruitland Sand-Pictured Cliffs completion is the SW/4 comprising 151.82 acres and the spacing unit for the Basin Fruitland Coal completion is the W/2 comprising 311.86 acres. The proposed downhole commingling will allow both completions to be produced under optimum conditions, will not result in damage or loss to either completion and will allow for the maximum recovery of gas reserves from both completions. NMOCD rules require that all interest owners receive notice of our proposed downhole commingling. Within the two spacing units, we currently have 13 fee royalty interest owners with a combined total royalty interest of less than 0.2% for which we do not have current address information. We have secured Mrs. Judith Wooderson of Wooderson & Associates to review all information within Dugan Production's files, plus pertinent records at the San Juan County Courthouse, the District Court, and San Juan Abstract & Title Company. To date, we have not been able to find contact information for the following individuals:

William E. Baldwin
Stefine Bjorkedal
Louis P., Gertrude E. & Eugene Brochu
Jack I. Clow
George & Gertrude Grinsteiner
Betty Jo Hulse
Anthony V. Magerscak & Lynn Cherly
Lena C. Poole
Almond C. Schroeder
Estate of Robert Treichel
Ernest E. & Ruth Wallinder
Catherine E. & Ralph Weaver
G.L. & Christena Whitman

Should anyone have contact information for any of the above listed individuals, please contact John Roe at Dugan Production's office at 505-325-1821.

API No. 30-045-35348
Basin Fruitland Coal (71629) &
Harper Hill Fruitland Sand-Pictured Cliffs (78160)
SWSW Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Ms. Bailey,

Attached for your consideration of the captioned application are copies of the certified mail return receipts for our notice given to interest owners in the subject well. There are three working interest owners in addition to Dugan Production and the royalty interest is either Federal or Fee. There are no State or Indian leases. The BLM approved our application on 1/8/14 and a copy of their approval is presented on Attachment No. 2. Attachment No. 1 presents copies of the certified mail return receipts for all working interest owners, the BLM for Federal royalty, plus 17 of the Fee royalty interest owners. In addition, we have included the US Postal Service (USPS) tracking system information for five Fee royalty interest owners for which we have not received receipts to date, but of the five, all have been given notice of our mailing and two show to have been delivered. The receipts presented on Attachment No. 1 plus Dugan Production's interest represent 99.1334% of the interest ownership. There are 25 Fee royalty interest owners with a combined interest ownership of 0.8666% for which we do not have receipts, however we did anticipate there would be Fee royalty interest owners for which we could not locate and did publish a notice of our application in the legal ads in the 11/24/13 issue of the Farmington Daily Times (Attachment No. 4 to our application presented this ad).

To date, we have not had any comment or objection from any of the interest owners.

Should you have questions or need additional information, please let me know.

Sincerely,

John D. Roe
Engineering Manager

Dugan Production's Federal I Com No. 103S
API No. 30-045-35348
Basin Fruitland Coal (71629) &
Harper Hill Fruitland Sand-Pictured Cliffs (78160)
SWSW Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Ms. Bailey & Mr. Evans,

We are writing to request your administrative approvals for the caption application. NMOCD form C-107A is attached. The subject well was completed on 10/31/13 with the Fruitland Coal perforated in four intervals 955' to 1087', the Fruitland Sand perforated in three intervals 978' to 1055' and the Pictured Cliffs perforated 1090'-1095'. The individual perforations are presented on Attachment No. 2. It is a common practice to complete these three intervals together since they are fairly close to each other, the fluids (gas and water) in each interval are compatible and each pool is anticipated to produce water that is more efficiently pumped as a commingled stream as opposed to installing dual sets of production equipment. With reference to Attachment No. 2, the Fruitland Sand and Fruitland Coal perforations are intermingled and the Pictured Cliffs perforations are only 3' below the lower most Fruitland Coal perforations, which will make it very difficult, if not impossible to produce the two pools separately.

Since there is not an established production history for the Federal I Com No. 103S, we are proposing that the commingled production be allocated using factors derived from average production data from the 35 wells that are within Section 12 and the adjacent eight sections (Sections 6, 7 & 18 of T-29N, & R-13W, plus Sections 1, 2, 11, 12, 13 & 14 of T-29N, R-14W). Attachment No. 1 presents the production data for 13 Fruitland Coal wells, 12 Fruitland Sand-Pictured Cliffs wells and 10 wells that are similarly downhole commingled. Also presented on Attachment No. 1 is the downhole commingling factors approved for the 10 wells that are currently downhole commingled. Based upon the average production data, the 23 Fruitland Coal wells (13 single and 10 DHC) average 75 mcf/d plus 38 BWPD per well and the 22 Fruitland Sand-Pictured Cliffs wells (12 single and 10 DHC) average 46 mcf/d plus 27 BWPD per well. Using these average production rates, our proposed allocation factors are:

	<u>Gas</u>	<u>Water</u>
Basin Fruitland Coal	62%	59%
Harper Hill Fruitland Sand-Pictured Cliffs	38%	41%

These proposed factors are within the range of the currently approved factors which are also presented on Attachment No. 1. Also presented on Attachment No. 1, we did verify the validity of our average production by excluding production data for the downhole commingled wells which did not significantly change the average production data. Only gas and water production is anticipated. Oil production does not occur in either pool and is not anticipated.

APPROVED BLM 1-8-14

dugan production corp.

March 14, 2014

Interest Owner Notice No. 2 (address list attached)
Dugan Production Corp.'s
Application to Downhole Commingle
Federal I Com well No. 103S
API No. 30-045-35348
SWSW (Unit M), Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Interest Owners,

According to our records, you have an interest ownership (working or royalty) in the subject well and as such we are writing to advise that in an application dated January 2, 2014, Dugan Production requested regulatory approvals from the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM) to downhole commingle production from the Basin Fruitland Coal and the Harper Hill Fruitland Sand-Pictured Cliffs gas pools in the subject well. This well was completed on 10/31/13 with the Fruitland Coal perforated in four intervals 955' to 1087', the Fruitland Sand perforated in three intervals 978' to 1055' and the Pictured Cliffs perforated 1090'-1095'. It is a common practice to complete these intervals together since they are fairly close to each other, the fluids (gas and water) in each interval are compatible and each pool is anticipated to produce water that is more efficiently pumped as a commingled stream as opposed to installing dual sets of production equipment. We are proposing that the commingled production from all intervals be allocated 62% to the Basin Fruitland Coal gas pool which will have a W/2 spacing unit, and 38% to the Harper Hill Fruitland Sand-Pictured Cliffs gas pool which will have a SW/4 spacing unit. These allocation factors represent an average of the production from 35 wells (13 Fruitland Coal wells, 12 Fruitland Sand-Pictured Cliffs wells and 10 wells that are similarly downhole commingled) in Section 12 and the adjacent eight sections. Since the interest ownership in these two pools is not identical, we are sending you a complete copy of our January 2nd application. Attachment No. 1 to our application presents the individual well data in support of our proposed allocation factors.

Our application was initially mailed to a total of 52 interest owners (4 working, 1 Federal royalty and 47 fee royalty) which are presented on Page No. 2 of the attached interest owner list. Subsequent to our 1/2/14 application, we have determined that there are 20 additional interest owners which are presented on Page No. 1 of the attached interest owner list. The NMOCD requires us to provide notice of our proposed downhole commingling to all interest owners which necessitates this notice to the interest owners that were not included in our initial notice. To date, we have had no comment or objection from any of the 52 interest owners initially notified of our application, and the BLM has approved our application.

Should you have questions or need additional information, please let me know. I can be reached at the letterhead address and phone. Should you have an objection to the proposed commingling, please let me know or you can contact the NMOCD directly at 1220 South St. Francis Drive, Santa Fe, NM 87505. I would appreciate being advised of your objection. Any objection you have should be given within 20 days from the date of this letter.

Sincerely,

John D. Roe
Engineering Manager

Re: Dugan's application dated 1/2/14 to Downhole Commingle
Federal I Com #103S (API No. 30-045-35348)
Unit M, Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Mr. Ezeanyim,

Attached is a copy of Dugan's letter dated 3/14/14 which did not get mailed until today (3/17/14) and does complete our required interest owner notice for our application to downhole commingle the Harper Hill Fruitland Sand-Pictured Cliffs gas pool (#78160) with the Basin Fruitland Coal gas pool (#71629) in the subject well. As presented on Page No. 1 of the address list, our 3/14/14 notice letter was mailed to 21 interest owners that were not included in the initial notice dated 1/2/14 which included 52 interest owners that are presented in Page No. 2 of the address list. To date, we have not had any objection from any of the 52 interest owners receiving our 1/2/14 notice, and the BLM has approved our application and does represent approximately 50% of the royalty interest in both spacing units. All notice was mailed by Certified-Return Receipt and upon receiving the receipts, I will send copies to you.

I'm very sorry for the interest owner confusion with this application, and do appreciate your patience in this matter.

Should you have questions, or need additional information, please let me know.

Sincerely,

John Roe

Re: Dugan Production's Application to Downhole Commingle dated 1/2/14
Dugan Production's Federal I Com #103S
API No. 30-045-35348
Basin Fruitland Coal (71629) &
Harper Hill Fruitland Sand-Pictured Cliffs (78160)
SWSW Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Richard,

Attached for your consideration of the captioned application are copies of the certified mail return receipts for our 2nd notice given to interest owners in the subject well. As a review, initially on 1/2/14 we provided notice of the subject downhole commingling application to the 52 interest owners (4 WI, 1 Federal royalty, and 47 fee royalty) in the subject well. In a letter dated 1/29/14 we did provide copies of return receipts or US Postal tracking reports for all working interest owners, plus the Federal royalty and 22 of the fee royalty interest owners which represented 99.1334% of the interest owners. There are no State or Indian leases in the subject well. In a letter dated 3/14/14, we provided a 2nd notice of the subject downhole commingling application to 21 additional fee royalty interest owners that subsequent to our initial mailing, we had determined to have an interest in the subject well and were not included in our initial notice. The "certified mail-return receipts" for this 2nd notice are presented on **Attachment No. 1** to this letter. Of the 21 fee interest owners presented with the 2nd notice, we have received receipts for 17 plus 4 were returned without being delivered. **Attachment No. 2** presents receipts for four of the fee interest owners included in our 1/2/14 notice for which we did not have receipts at the time of our letter dated 1/29/14, but have subsequently received their receipts. Thus, to date we have presented receipts for all working interest owners, plus the Federal royalty interest and 48 of the 68 fee royalty interest owners which represent a total interest ownership of 97.7055%. It should be noted that the BLM did approve the subject application on 1/8/14 and a copy is present in **Attachment No. 3**. To date we have 20 fee royalty interest owners with a combined ownership of 2.2477% that we have not been able to provide notice, however we did anticipate there would be fee royalty interest owners for which we could not locate and did publish a notice of our application in the legal ads in the 11/24/13 issue of the Farmington Daily Times, and a copy of this notice is presented in **Attachment No. 4**.

To date we have not had any comment or objection from any of the interest owners receiving our application and representing a total ownership of 97.7%.

Should you have questions or need additional information, please let me know.

Sincerely,

John D. Roe
Engineering Manager

Re: Application to Downhole Commingle gas & water
Dugan Production's Federal I Com No. 103S
API No. 30-045-35348
Basin Fruitland Coal (71629) &
Harper Hill Fruitland Sand-Pictured Cliffs (78160)
SWSW Section 12, T-29N, R-14W
San Juan County, New Mexico

Dear Ms. Bailey & Mr. Evans,

We are writing to request your administrative approvals for the caption application. NMOCD form C-107A is attached. The subject well was completed on 10/31/13 with the Fruitland Coal perforated in four intervals 955' to 1087', the Fruitland Sand perforated in three intervals 978' to 1055' and the Pictured Cliffs perforated 1090'-1095'. The individual perforations are presented on Attachment No. 2. It is a common practice to complete these three intervals together since they are fairly close to each other, the fluids (gas and water) in each interval are compatible and each pool is anticipated to produce water that is more efficiently pumped as a commingled stream as opposed to installing dual sets of production equipment. With reference to Attachment No. 2, the Fruitland Sand and Fruitland Coal perforations are intermingled and the Pictured Cliffs perforations are only 3' below the lower most Fruitland Coal perforations, which will make it very difficult, if not impossible to produce the two pools separately.

Since there is not an established production history for the Federal I Com No. 103S, we are proposing that the commingled production be allocated using factors derived from average production data from the 35 wells that are within Section 12 and the adjacent eight sections (Sections 6, 7 & 18 of T-29N, & R-13W, plus Sections 1, 2, 11, 12, 13 & 14 of T-29N, R-14W). Attachment No. 1 presents the production data for 13 Fruitland Coal wells, 12 Fruitland Sand-Pictured Cliffs wells and 10 wells that are similarly downhole commingled. Also presented on Attachment No. 1 is the downhole commingling factors approved for the 10 wells that are currently downhole commingled. Based upon the average production data, the 23 Fruitland Coal wells (13 single and 10 DHC) average 75 mcf/d plus 38 BWP/D per well and the 22 Fruitland Sand-Pictured Cliffs wells (12 single and 10 DHC) average 46 mcf/d plus 27 BWP/D per well. Using these average production rates, our proposed allocation factors are:

	<u>Gas</u>	<u>Water</u>
Basin Fruitland Coal	62%	59%
Harper Hill Fruitland Sand-Pictured Cliffs	38%	41%

These proposed factors are within the range of the currently approved factors which are also presented on Attachment No. 1. Also presented on Attachment No. 1, we did verify the validity of our average production by excluding production data for the downhole commingled wells which did not significantly change the average production data. Only gas and water production is anticipated. Oil production does not occur in either pool and is not anticipated.

APPROVED BLM 1-8-14

ON 11/24/13 JOHN ELCHERT
appeared before me, whom I know personally
to be the person who signed the above
document.

Dugan Production Corp is applying to the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM) for approvals to downhole commingle natural gas and water production from the Harper Hill Fruitland Sand-Pictured Cliffs (Pool No. 78160), and Basin Fruitland Coal (Pool No. 71629) gas pools within the wellbore of its Federal I Com No. 1035 (API No. 30-045-35348) located in the SWSW (Unit M) of Section 12, Township 29N, Range 14W in San Juan County, New Mexico. The spacing unit for the Harper Hill Fruitland Sand-Pictured Cliffs completion is the SW/4 comprising 151.82 acres and the spacing unit for the Basin Fruitland Coal completion is the W/2 comprising 311.86 acres. The proposed downhole commingling will allow both completions to be produced under optimum conditions, will not result in damage or loss to either completion and will allow for the maximum recovery of gas reserves from both completions. NMOCD rules require that all interest owners receive notice of our proposed downhole commingling. Within the two spacing units, we currently have 13 fee royalty interest owners with a combined total royalty interest of less than 0.2% for which we do not have current address information. We have secured Mrs. Judith Wooderson of Wooderson & Associates to review all information within Dugan Production's files, plus pertinent records at the San Juan County Courthouse, the District Court, and San Juan Abstract & Title Company. To date, we have not been able to find contact information for the following individuals:
