Re: Application of Tap Rock Operating, LLC, for administrative approval of an unorthodox well location for its Cypress 34 23S29E3434 #233H Well in the E/2 of Section 34, Township 23 South, Range 29 East, N.M.P.M., Eddy County, New Mexico.

Dear Ms. Sandoval:

Tap Rock Operating, LLC ("Tap Rock") (OGRID No. 372043) seeks administrative approval of an unorthodox well location for its **Cypress 34 23S29E3434 #233H Well** (API No. Pending) to be completed within the Purple Sage; Wolfcamp Pool (98220) underlying the E/2 of Section 34, Township 23 South, Range 29 East, N.M.P.M., Eddy County, New Mexico.

This well will be drilled from a *surface location* 241 feet from the north line and 1,171 feet from the east line (Lot 1) of Section 3, Township 24 South, Range 29 East, to a *bottom hole location* 5 feet from the north line and 2,010 feet from the east line (Unit B) of Section 34. The *first take point* will be located 100 feet from the south line and 2,010 feet from the east line (Unit O) of Section 34 and the *last take point* will be 100 feet from the north line and 2,010 feet from the east line (Unit B) of Section 34.

Pursuant to Division Order R-14262, this acreage is governed by the Special Rules for the Purple Sage; Wolfcamp (Gas) Pool which provide for wells in the Wolfcamp formation in Eddy County to be located no closer than 330 feet to the outer boundary of the spacing unit. The completed interval for the **Cypress 34 23S29E3434 #233H Well** will be unorthodox because it is closer than 330 feet to the northern and southern boundaries of the horizontal spacing unit. Approval of the unorthodox completed interval will allow Tap Rock to use its preferred well spacing plan for horizontal wells in this area and thereby prevent waste.

Exhibit A is a Well Location and Acreage Dedication Plat (Form C-102), which shows that the completed interval of the proposed **Cypress 34 23S29E3434 #233H Well** encroaches on the spacing units to the north and south.

Exhibit B is a land plat that shows the proposed **Cypress 34 23S29E3434 #233H Well** in relation to the adjoining spacing units to the north in Section 27 and to the south in Section 3.

Ownership is diverse between the subject spacing unit and the tracts to the north and south. A copy of this application with all attachments has been sent by certified mail to each affected party advising them that if they have an objection it must be filed in writing with the Division within 20 days from the date the Division receives the application. **Exhibit C** is a list of the parties affected by the encroachment to the north and south, including the Bureau of Land Management, together with the tracking information reflecting notice has been provided to those parties.

Exhibit D is a statement from Tap Rock's petroleum engineer confirming that Tap Rock's requested unorthodox location is necessary to optimize well spacing, thereby preventing waste.

Your attention to this matter is appreciated.

Sincerely,

Kaitlyn A. Luck

**Re: Non-Standard Location Request
Cypress 34 Federal #233H, #243H and #246H (the "Wells")**

Dear Ms. Sandoval:

Tap Rock Operating hereby requests administrative approval of a non-standard location for each of the Wells referenced above by decreasing the first and last take points from 330 feet to 100 feet from the horizontal plane outer boundary. The Wells are located in the Purple Sage-Wolfcamp Gas Pool (Pool Code 98220). It is Tap Rock's responsibility as a prudent operator to maximize lateral length and to minimize reserves left in the ground. Decreasing the first and last take points will increase the wells effective lateral length by 460 feet thereby increasing ultimate recovery of reserves and thereby preventing waste of natural resources.

Sincerely,

TAP ROCK OPERATING, LLC
