Ms. Hays,

It looks like the 3 leases that Mammoth Exploration, LLC wants to commingle are the following:

EO 108510
EO 12513
BO 56594

Please confirm that this is correct.

Subject: Lea A State surface commingle application

Ms. Hays,

From our phone conversations, I believe I have a good understanding of what we are looking at now, but I will need the following things:

A Lease map showing where the wells are and what leases they belong too.

A map showing where the battery is. (could be shown on the afore mentioned lease map if desired)

A list of the interest owners with the tracking numbers and dates showing that notification was sent to them.

A sample letter or statement demonstrating what was sent to the interest owners in the notification.

A written statement about how allocation will occur. (As in the use of a mobile separator, etc.)

A facility diagram showing the lines connecting the treater, header from the wells, and tanks etc.

You can either combine the items into an additional information packet or just add them to the original application and submit an amended application. Which ever is most convenient for you is fine. Please email it to me and CC OCD.engineer@state.nm.us

If you have any questions or concerns, do not hesitate to call or email.

Dean McClure
