Re: Notification of Salt Water Disposal Well Prospect – Request for Waiver of Objection

Dear Mr. Yocham,

Trove Energy and Water, LLC submitted a C-108 application for SWD to the New Mexico Oil Conservation Division nearly one year ago. Unfortunately, your company was missed for notification during the review effort. Based on a recent BLM field inspection, it was determined that the location would need to move slightly to avoid an existing right-of-way. During OCD's review of the application, they identified you as a well operator within the one-mile area of review (AOR) that must be notified.

Details are included in the attached pages of the project and the new location.

As an operator, you know the logistical challenges imposed by regulatory delays. Since the project has been developed and the application submitted and in the regulatory process for an extended period, we respectfully request that you review the project details provided and that you and your company hereby waive any objection by signing and returning this page to me. I will then submit it to the OCD for completion of the subject application file.

I apologize again for the original oversight; it was inadvertent. Please feel free to call if you have any questions.

Thank you for your understanding and prompt attention to this matter.

Best regards,

Ben Stone, SOS Consulting, LLC
Agent for Trove Energy and Water, LLC
