13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Coleman Oil & Gas, Inc proposes to add the Middle Mesa Com #3 to the current Surface Commingling Order PLC-233. The Middle Mesa Com #3 sales meter will be converted to the CDP for the Surface Commingle. An Allocation meter will be installed at the Middle Mesa Com #3. Addition of the Middle Mesa Com #3 to the current surface commingling order will allow wells to share a common compressor thus increasing economics and well life. See the attached information. Reference CA NMNM99454.

14. I hereby certify that the foregoing is true and correct.
