Mr. McClure,

Please see attached for the statement from our landman on identical ownership.

Based on the BTU values of our current sales gas at the AR #6, we are confident that we will see a BTU value of around 1.395 for both pools.

Thank you for your time and attention to this application!

Subject: downhole commingling application DHC-5088

Mr. Bates,

I am reviewing the downhole commingling application for the Arnott Ramsay NCT B #6 (30-025-26278) operated by FAE II Operating, LLC (329326).

Please provide a BTU value of the gas from pool 33820 and an estimated BTU value of the gas from pool 37240.

Please submit a statement from your landman confirming that ownership between these two pools is identical.
