**Re: Application of Chesapeake Operating, Inc. for administrative approval of an unorthodox well location for its PLU Pierce Canyon 20 24 30 USA Well No. 1H to be drilled from a surface location and penetration point 75 feet from the North line and 1725 feet from the East line and a bottomhole location 350 feet from the South line and 1980 feet from the East line of Section 20, Township 24 South, Range 30 East, NMPM, Eddy County, New Mexico.**

Dear Ms. Bailey:

Chesapeake Operating, Inc. ("Chesapeake") hereby seeks administrative approval pursuant to the provisions of Division Rules 19.15.15.13 and 19.15.16.14 for an unorthodox well location for its PLU Pierce Canyon 20 24 30 USA Well No. 1H. This wildcat well is located in Section 20, Township 24 South, Range 30 East, N.M.P.M., Eddy County, New Mexico and is to be drilled in the Bone Spring formation at a surface location and a penetration point 75 feet from the North line and 1725 feet from the East line and a bottomhole location 350 feet from the South line and 1980 feet from the East line of Section 20, Eddy County, New Mexico. A 160-acre project area has been dedicated to this horizontal well comprised of the W/2 E/2 of Section 20.

This location is unorthodox because the Bone Spring formation under this acreage is governed by the Division's statewide rules which provide for wells on 40-acre spacing units to be located no closer than 330 feet to the outer boundary of the spacing unit. Division Rule 19.15.16.14 defines the "Penetration Point" as "the point where the wellbore penetrates the top of the pool from which it is intended to produce." The wellbore penetrates the Bone Spring formation at a point 75 feet from the North line of Section 20, 275 feet north of the producing area, and is therefore closer than allowed by Division rules.

Although the wellbore penetrates the top of the Bone Spring at an unorthodox location, the well will be at a standard location at the producing interval. Chesapeake is targeting the Upper Avalon at approximately 7,848 feet (TVD). Therefore, once Chesapeake reaches the targeted formation, it will be at a standard location.

**Exhibit A** is a plat showing the location of the well. This location is encroaching to the north of Section 20. This location is within the Poker Lake Unit which is operated by BOPCo. A copy of this application with all attachments was mailed to BOPCo. and they were advised that if they have an objection to this application it must be filed in writing with the Division's Santa Fe office within twenty days from the date notice was sent. BOPCo. was also advised that if no objections were received by the Division within twenty days, the Division Director could approve the application.

**Exhibit B** is the C-102 for this well.

**Exhibit C** is the notice list.

Your attention to this application is appreciated.

Sincerely,

Ocean Munds-Dry
