Attention: Keith Logan

Dear Mr. Logan:

We are in receipt of your recent application for downhole commingling within the wellbore of the Pardue 8808 JV-P Well No. 1 located in Section 11, Township 23 South, Range 28 East, NMPM, Eddy County, New Mexico. Please be advised that further information is necessary in order to process your application. I am enclosing for your information a copy of Division Rule No. 303 (C)(2) which outlines what information must be submitted when requesting approval to downhole commingle. Also, from the information that you have submitted, it is not clear whether or not the interest in the two zones is common throughout. Please address this issue as well, inasmuch as if the interest is not common, your application cannot be approved administratively. If you should have any questions, please feel free to contact me at (505) 827-5800.

*Talked to K. Logan  
12/28. Advised that at  
current rate from Alaska, they  
cannot justify laying pipeline to well.  
Interest is common.  
Rate expected from Marcellus - approx 200-300 MCFD  
Will treat Marcellus separately when opened up.  
ok*

Sincerely,

A handwritten signature in dark ink, appearing to read "David Catanach".
