

Questionnaire

New Mexico Energy, Minerals and Natural Resources Department

(1W-30C

Susana Martinez Governor

John H. Bemis Cabinet Secretary-Designate

Brett F. Woods, Ph.D. Deputy Cabinet Secretary

May 12, 2011

Only Water Quality Control Commission- regulated systems will be incorporated into the OCD's WQCC Permits, while OCD regulated systems will be handled under separate permit(s). A current discharge permit is valid until its normal expiration date or November 15, 2012, whichever is later. All facilities with processes subject to the Water Quality Act must have permits in place by November 16, 2012. H2S Contingency Plans; pits, ponds, above and/or below-grade tanks; waste treatment, storage and disposal; and landfarms and landfills may require separate permitting under the OCD Oil, Gas, and Geothermal regulations.

Proper completion and timely submission of this questionnaire is requested for all facilities with discharge permit expiration dates before November 15, 2012. Please complete and submit a separate questionnaire for each facility <u>before July 15, 2011</u>.

Name of the owner or operator of the facility Enterprise Field Services, LLC
Point of contact Name Runell Seale Telephone (505) 599-2124 Email rseale@eprod.com Mailing address 614 Reilly Ave Farmington, NM 87401
Facility name Reed Canyon Compressor Station
Facility location Unit Letter, Section, Township, Range <u>H, S14, T26N, R9W</u> Street address (if any) Latitude: Longitude: Not available
• Facility type Refinery Gas Plant Compressor Crude Oil Pump Station Injection Well Service Company Geothermal Abatement Other (describe)
Current and Past Operations (please check all that apply) Impoundments Treatment Plant Waterflood Disposal Well Brine Well Wash Bay Steam Cleaning Groundwater Remediation

	Oil & Gas Facilities Inventory Questionnaire May 12, 2011 Page 2 of 3
	• Facility Status Active I Idle Closed
	• Does this facility currently have a discharge permit? Xes INO
	If so, what is the permit number? <u>GW-300</u>
	 Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface or ground water? (This includes process activities, equipment maintenance, or the cleanup of historic spills.)
	If so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.
	· · · · · · · · · · · · · · · · · · ·
	 What is the depth below surface to shallowest ground water in the area? <u>120</u>'
	Are there any water supply, groundwater monitoring, or recovery wells at the facility? Water supply Monitoring Recovery NA
	If these wells are registered with the Office of the State Engineer (OSE), what are the OSE well numbers?
	well numbers?
· ·	 well numbers? Are abatement actions ongoing? <u>Not applicable</u> Are there any active or inactive UIC wells present as part of the federal Underground
	 well numbers?
•	 well numbers? Are abatement actions ongoing? Not applicable Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? Yes No If so, what are the API numbers assigned to those wells?
•	well numbers? • Are abatement actions ongoing? Not applicable • Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? Yes ✓ No If so, what are the API numbers assigned to those wells? • Are there any sumps at the facility? Yes ✓ No Number of sumps with volume less than 500 gallons
•	well numbers? • Are abatement actions ongoing? Not applicable • Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? Yes No If so, what are the API numbers assigned to those wells? • Are there any sumps at the facility? Yes No
•	well numbers? • Are abatement actions ongoing? Not applicable • Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? Yes ☑ No If so, what are the API numbers assigned to those wells? • Are there any sumps at the facility? ☑ Yes We Number of sumps with volume less than 500 gallons ☑ No Use and contents ☑ Yes Is secondary containment incorporated into the design? ☑ Yes Number of sumps with volume greater than 500 gallons ☑ Use and contents ☑ Is secondary containment incorporated into the design? ☑ Yes Number of sumps with volume greater than 500 gallons ☑ Use and contents ☑ Use and contents ☑
•	well numbers? • Are abatement actions ongoing? Not applicable • Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? Yes ☑ No If so, what are the API numbers assigned to those wells? • Are there any sumps at the facility? Yes Well number of sumps with volume less than 500 gallons ☑ No Use and contents ☑ Yes Is secondary containment incorporated into the design? Yes Number of sumps with volume greater than 500 gallons
