Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit

Only Water Quality Control Commission- regulated systems will be incorporated into the OCD's WQCC Permits, while OCD regulated systems will be handled under separate permit(s). A current discharge permit is valid until its normal expiration date or November 15, 2012, whichever is later. All facilities with processes subject to the Water Quality Act must have permits in place by November 16, 2012. H2S Contingency Plans; pits, ponds, above and/or below-grade tanks; waste treatment, storage and disposal; and landfarms and landfills may require separate permitting under the OCD Oil, Gas, and Geothermal regulations.

Proper completion and timely submission of this questionnaire is requested for all facilities with discharge permit expiration dates before November 15, 2012. Please complete and submit a separate questionnaire for each facility <u>before July 15, 2011</u>.

Targa Midstream Services, L.P. Point of contact Name Cal Wrangham (432) 688-0542 Telephone CWrangham@targaresources.com Email 6 Desta Drive, Suite 3300 Mailing address Midland, TX 79705 **Buckeye Compressor Station** Facility name_ Facility location Unit Letter, Section, Township, Range Street address (if any) Gas Plant Compressor • Facility type Refinery Crude Oil Pump Station Injection Well Service Company Geothermal Abatement Other (describe) Compressor Station • Current and Past Operations (please check all that apply) Waterflood **Impoundments Treatment Plant** Disposal Well Brine Well Wash Bay

Oil & Gas Facilities Inventory Questionnaire May 12, 2011 Page 2 of 3

Pacility Status Active Idle Closed Does this facility currently have a discharge permit? Yes No f so, what is the permit number? GW-029 Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface of ground water? (This includes process activities, equipment maintenance, or the cleanup of historic spills.) Yes No f so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.
Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface of ground water? (This includes process activities, equipment maintenance, or the cleanup of historic spills.) Yes No f so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.

than potable water being released either onto the ground or directly into surface of ground water? (This includes process activities, equipment maintenance, or the cleanup of historic spills.) Yes No f so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.
• What is the depth below surface to shallowest ground water in the area?
• Are there any water supply, groundwater monitoring, or recovery wells at the facility? Water supply Monitoring Recovery If these wells are registered with the Office of the State Engineer (OSE), what are the OS
well numbers? Are abatement actions ongoing? The groundwater remediation and monitor wells are owned and operated by Chevron
Are there any active or inactive UIC wells present as part of the federal Undergroun njection Control program associated with this facility? Yes No
f so, what are the API numbers assigned to those wells?
Are there any sumps at the facility? Number of sumps with volume less than 500 gallons Use and contents Inlet scrubber Is secondary containment incorporated into the design? No Number of sumps with volume greater than 500 gallons Use and contents Use and contents Is secondary containment incorporated into the design? No

Oil & Gas Facilities Inventory Questionnaire May 12, 2011 Page 3 of 3

 Does the facility incorporate any underground lines freshwater, natural gas for heating, or sanitary sewers? If so, what do those buried lines contain? 	 electrical conduits,
In SO, What do those buried lines contain? Inlet gas lines - residue fuel for engines, scrubber drain lines.	

THIS FORM IS DUE TO THE OIL CONSERVATION DIVISION BY JULY 15, 2011.

Questions? Please contact Glenn VonGonten at 505-476-3488 or Carl Chavez at 505-476-3490.

Thank you for your cooperation.
