Windmill Oil

“Hobbs Pool”

General Information

OIL CONSERVATION COMMISSION
P. O. BOX 871
SANTA FE, NEW MEXICO

No. 33-57

MEMORANDUM:

TO: All Operators in the Hobbs, Bowers and Byers-Queen Pools

FROM: A. L. PORTER, Jr., Secretary-Director

SUBJECT: Protection of Fresh Water

1. Prior to January 1, 1958, all open bradenheads must be closed in a permanent manner with bleeder lines brought to the surface with a valve attached which should remain open at all times, Form C-103, original and two copies, must be filed with the Hobbs Commission Office upon completion of the work.

2. Beginning January 1, 1958, casing leak surveys will be conducted on a quarterly basis. The results of such tests must be filed by the 15th of each of the following months on a form prescribed by the Commission: January, April, July, and October. (The first report for 1958 will be due April 15, 1958.) The tests taken during the quarter beginning April 1, will be witnessed by a Commission representative as per published schedule. Forms for the reporting of the results of surveys will be available at the Hobbs Commission Office.

3. No oil field brines shall be disposed of in earthen pits in the Hobbs Pool area after completion of the Hobbs Pool Salt Water Disposal System.

4. No waste oil nor basic sediment shall be disposed of in earthen pits in the Hobbs Pool Area.

5. All operators are urged to institute measures for the prevention of both internal and external corrosion.

November 18, 1957

ga

NEW MEXICO OIL CONSERVATION COMMISSION

P. O. BOX 2045

HOBBS, NEW MEXICO

NOTICE

TO: All Hobbs Pool Area Operators

SUBJECT: Casing Leak Survey

You are hereby reminded that the Directors Memorandum No. 33-57, requires that a quarterly casing leak survey be conducted, and that the results of the first test are to be filed by April 15, 1958. This information is to be filed on the enclosed form. Additional copies can be obtained at the Hobbs District office.

The second quarterly test will be witnessed by Commission personnel.

A detailed schedule will be distributed on or about March 1, 1958. A company desiring any special consideration insofar as it pertains to the mechanics of the scheduling, contact Mr. Eric Engbrecht.

Date sent out
January 22, 1958

NEW MEXICO OIL CONSERVATION COMMISSION

P. O. BOX 2045

HOBBS, NEW MEXICO

To: All operators in the Hobbs, Bowers, Byers Queen Gas and Hobbs Drinkard Pools.

In accordance with the memorandum issued by the District Engineer pertaining to casing pressure tests in the above-named pools, the following wells will be readied for an annual inspection in the manner and on the date as herein outlined.

1. All wells must be shut in 24 hours before inspection will be witnessed
2. All cellars will be dug in a manner to expose the outlets of all bradenheads from the first string of pipe cemented in the well and to expose all subsequent heads to and including the tubing head, unless a C-103 has been filed, indicating satisfactory connections below the ground level and with proper identification above ground level.
3. One opening from all bradenheads will be connected above the surface of the ground with a second valve. The second valve must be closed in compliance with paragraph number one.
4. The operator must furnish connections and personnel who will assist in the opening of valves. Pressure gauges to record pressures should also be furnished, if possible.
5. The Proration Manager will be notified of a well that has failed to meet the requirement of preparation as outlined on the date-time schedule, and such well will be immediately removed from the proration schedule. The loss of allowable will begin from the date of the bradenhead inspection of the well.
6. If, due to unusual mechanical difficulties or workover operations, a particular well cannot be made ready at the time set forth on the schedule, its test date may be delayed after inspection of the conditions by the Commission representative. The Commission should be notified at least 48 hours prior to test time for well or wells that require such delays.
7. The Commission expects company personnel to be present at the meeting place on the date and time indicated on the attached schedule. If for any reason the operator or his representative cannot be present, the Commission must be notified in advance.

In every case, the Commission representative will meet the company personnel at the place and time shown on the schedule and proceed to all listed wells in logical order.

8. For further information or questions, please contact Eric Engbrecht, Express 3-6161, Hobbs, New Mexico.

Following is a tabulation of the time-date schedule of the wells to be tested in the annual witnessed survey.

OIL CONSERVATION COMMISSION

HOBBS, NEW MEXICO

June 30, 1965

Mr. A. L. Porter, Jr.
Secretary-Director
New Mexico Oil Conservation Commission
Post Office Box 2088
Santa Fe, New Mexico

Re: Hobbs Area Annual Witnessed
Casing Leak Survey for 1965

Dear Mr. Porter:

In accordance with Memorandum No. 33-57 the Commission witnessed casing leak survey was conducted in the Hobbs, Bowers, Byers-Queen Gas, and Hobbs-Drinkard Pools during the second quarter of 1965. During this survey one well with communication was found, and a total of four wells with surface leaks have been requested to be repaired and retested.

As of this date work on the well with communications has been completed and is now all right. The work on the wells with surface leaks has not been completed as of this date.

In view of the favorable findings during Commission witnessed surveys in the past, it is our recommendation that they be continued.

Very truly yours,

OIL CONSERVATION COMMISSION

Leslie A. Clements
Oil & Gas Inspector

NEW MEXICO OIL CONSERVATION COMMISSION

P. O. BOX 2045

HOBBS, NEW MEXICO

*Work Sheet for
1959 - complete
Survey -*

To: All operators in the Hobbs, Bowers, Byers Queen Gas and Hobbs Drinkard Pools.

33-57
In accordance with the memorandum ~~issued by the District Engineer~~ *33-57* pertaining to ~~easing pressure tests in the above-named pools~~, the following wells will be readied for an annual inspection in the manner and on the date as herein outlined.

1. All wells must be shut in 24 hours before inspection will be witnessed
2. All cellars will be dug in a manner to expose the outlets of all braden-heads from the first string of pipe cemented in the well and to expose all subsequent heads to and including the tubing head, unless a C-103 has been filed, indicating satisfactory connections below the ground level and with proper identification above ground level.
3. One opening from all bradenheads will be connected above the surface of the ground with a second valve. The second valve must be closed in compliance with paragraph number one.
4. The operator must furnish connections and personnel who will assist in the opening of valves. Pressure gauges to record pressures should also be furnished, if possible.
5. The Proration Manager will be notified of a well that has failed to meet the requirement of preparation as outlined on the date-time schedule, and such well will be immediately removed from the proration schedule. The loss of allowable will begin from the date of the bradenhead inspection of the well.
6. If, due to unusual mechanical difficulties or workover operations, a particular well cannot be made ready at the time set forth on the schedule, its test date may be delayed after inspection of the conditions by the Commission representative. The Commission should be notified at least 48 hours prior to test time for well or wells that require such delays.
7. The Commission expects company personnel to be present at the meeting place on the date and time indicated on the attached schedule. If for any reason the operator or his representative cannot be present, the Commission must be notified in advance.

In every case, the Commission representative will meet the company personnel at the place and time shown on the schedule and proceed to all listed wells in logical order.

8. For further information or questions, please contact Eric Engbrecht, Express 3-6161, Hobbs, New Mexico.

Following is a tabulation of the time-date schedule of the wells to be tested in the annual witnessed survey.

NEW MEXICO OIL CONSERVATION COMMISSION

P. O. BOX 2045

HOBBS, NEW MEXICO

To: All operators in the ~~Crossroads, Crossroads Devonian East, Crossroads Devonian South, and Crossroads Pennsylvanian Pools~~ *Hobbs, Bowers, Byers, Queen Gas & Hobbs Drilled Pools.*

In accordance with the memorandum issued by the District Engineer pertaining to casing pressure tests in the above-named pools, the following wells will be readied for an ~~initial~~ *Annual* inspection in the manner and on the date as herein outlined.

1. All wells must be shut in 24 hours before inspection will be witnessed.
2. All cellars will be dug in a manner to expose the outlets of all bradenheads from the first string of pipe cemented in the well and to expose all subsequent heads to and including the tubing head, *unless a C-103 has been filed, indicating satisfactory connections below ground level.*
3. One opening from all bradenheads will be connected above the surface of the ground with a second valve. The second valve must be closed in compliance with paragraph number one. *with proper identification above ground level.*
4. The operator must furnish connections and personnel who will assist in the opening of valves. Pressure gauges to record pressures should also be furnished, if possible.
5. The Proration Manager will be notified of a well that has failed to meet the requirement of preparation as outlined on the date-time schedule, and such well will be immediately removed from the proration schedule. The loss of allowable will begin from the date of the bradenhead inspection of the well.
6. If, due to unusual mechanical difficulties or workover operations, a particular well cannot be made ready at the time set forth on the schedule, its test date may be delayed after inspection of the conditions by the Commission representative. The Commission should be notified at least 48 hours prior to test time for well or wells that require such delays.
7. The Commission expects company personnel to be present at the meeting place on the date and time indicated on the attached schedule. If for any reason the operator or his representative cannot be present, the Commission must be notified in advance.

In every case, the Commission representative will meet the company personnel at the place and time shown on the schedule and proceed to all listed wells in logical order.

8. For further information or questions, please contact Eric Engbrecht, Express 3-6161, Hobbs, New Mexico,

Following is a tabulation of the time-date schedule of the wells to be tested in the ~~initial~~ *Annual* survey.
