Subject: Re: Discharge Permit Questionnaires for Hobbs and Artesia facilities

Leonard:

Thanks for talking with me a few minutes ago. Find attached the completed questionnaires for the two Halliburton facilities at Hobbs and Artesia in New Mexico. As discussed, please let us know what your determination is regarding discharge permit renewals for both facilities.

Thanks.

Sincerely,

Akin Olubiyi

Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit

Only Water Quality Control Commission- regulated systems will be incorporated into the OCD's WQCC Permits, while OCD regulated systems will be handled under separate permit(s). A current discharge permit is valid until its normal expiration date or November 15, 2012, whichever is later. All facilities with processes subject to the Water Quality Act must have permits in place by November 16, 2012. H2S Contingency Plans; pits, ponds, above and/or below-grade tanks; waste treatment, storage and disposal; and landfills and landfills may require separate permitting under the OCD Oil, Gas, and Geothermal regulations.

Proper completion and timely submission of this questionnaire is requested for all facilities with discharge permit expiration dates before November 15, 2012. Please complete and submit a separate questionnaire for each facility before July 15, 2011.

• Name of the owner or operator of the facility

HALLIBURTON ENERGY SERVICES

• Point of contact

Name Tom HART
Telephone 575-392-0749
Email tom.hart@halliburton.com
Mailing address 5801 N. Lovington Hwy
Hobbs, N.M. 88240

• Facility name

• Facility location

Unit Letter, Section, Township, Range Section 7, Township 18 South, Range 38 EAST
Street address (if any) 5801 N. Lovington Hwy Hobbs, New Mexico 88240

☐ Steam Cleaning

☐ Groundwater Remediation

• Facility Status ☒ Active ☐ Idle ☐ Closed

• Does this facility currently have a discharge permit? ☒ Yes ☐ No

If so, what is the permit number? GW-074

• Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface or ground water?

(This includes process activities, equipment maintenance, or the cleanup of historic spills.)

☐ Yes ☒ No

If so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.

N/A

• What is the depth below surface to shallowest ground water in the area? 70 ft.

• Are there any water supply, groundwater monitoring, or recovery wells at the facility?

Water supply ☐ Monitoring ☐ Recovery ☐

If these wells are registered with the Office of the State Engineer (OSE), what are the OSE well numbers? N/A

• Are abatement actions ongoing? N/A

• Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility? ☐ Yes ☒ No

If so, what are the API numbers assigned to those wells?

N/A

• Are there any sumps at the facility? ☒ Yes ☐ No

Number of sumps with volume less than 500 gallons SEVEN

Use and contents TWO ARE OUT OF SERVICE / FIVE CONTAIN WASTEWATER

Is secondary containment incorporated into the design? ☐ Yes ☒ No

Number of sumps with volume greater than 500 gallons NINE

Use and contents CONTAINS WASTEWATER AND SUMPPRIT / RINSEATE

Is secondary containment incorporated into the design? ☐ Yes ☒ No

- Does the facility incorporate any underground lines other than electrical conduits, freshwater, natural gas for heating, or sanitary sewers? ☐ Yes ☒ No

If so, what do those buried lines contain?

Other than the underground lines associated with the
sumps and below grade tanks.

THIS FORM IS DUE TO THE OIL CONSERVATION DIVISION BY JULY 15, 2011.

Questions? Please contact Glenn VonGonten at 505-476-3488 or Carl Chavez at 505-476-3490.

Thank you for your cooperation.
