Subject: RE: (Release) Anemome ANE Federal #2 Work Plan

Reference: Yates Petroleum * Anemome ANE Fed 002 * 30-015-27982 * D-9-22s-24e * Eddy County, New Mexico

Release Date: 1/20/2011 (2RP-751)

Release Date: 4/15/2011 (2RP-750)

Release Date: 4/22/2011 (2RP-765)

Amanda,

The three releases as referenced above, have resulted in a net loss of 37 bbl oil and 77 bbls produced water. The proposal to relocate equipment to facilitate excavation of impacted material and perform delineation of the site is approved. Once the contaminant delineation has been performed, please submit a proposal for remediation based on the delineation results and site ranking.

The following conditions/stipulations for this approval apply:

- Notify OCD 48 hours prior to commencement of activities.
- Notify OCD 48 hours prior to obtaining samples where the analyses will be presented to OCD.
- Chloride levels will be a consideration for remedial requirements and closure approval.
- Submit a closure report and Final Report C-141 upon satisfactory completion of project.
- Project is to be completed and closure documents submitted not later than June 30, 2011.
- Like approval by BLM as may be applicable.

OCD approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
