State of New Mexico Oil Conservation Division ATTEN: Mr. Frank Chavez 1000 Rio Brazos Road Aztec, NM 87410

Downhole Commingle and Dual Complete Re: Breech "B" 220-R 1750' FEL and 944' FNL Sec. 14, 26N, 7W Rio Arriba County, New Mexico

Dear Mr. Chavez:

We are requesting administrative approval for a change of dual completion and downhole commingling of above-referenced well.

Order No. 5926 approved downhole commingling and dual completion of this well, with Pictured Cliffs, Otero Chacra, and Mesa Verde commingled above packer, and Dakota zone below packer.

We now wish to amend Order No. 5926 to commingle Pictured Cliffs and Otero Chacra above packer, and Mesa Verde and Dakota commingled below packer.

We recommend production split for Pictured Cliffs and Otero Chacra be 70% of all gas to Pictured Cliffs and 30% of all gas to Otero Chacra as approved for this acreage by Order No. 5648.

From attached production history tabulation results, we recommend 66% of all oil and 45% of all gas be allocated to Dakota zone, and 34% of all oil and 55% of all gas be allocated to Mesa Verde zone.

Production history taken from C-115 reports 1992 and 1993.

Attached schematic shows proposed completion of commingled well.

Ownership is common, including working and royalty interest for all zones producing from this well.

Copy of sundry notice to BLM is attached.

All offset operators have been notified by certified letter of proposed commingling plans.

Copies of letter and receipts for certified mail are attached.

If you have any questions, please contact me at (505) 632-1544. Thank you.

Sincerely,

Robert I Verguen

BLM CONDITIONS OF APPROVAL

Operator <u>Caulkins Oil Company</u>	Well Name 220R Breech B
Legal Location 944'FNL/1750'FEL	Sec. <u>14</u> T. <u>26 N.</u> R. <u>7 W.</u>
N 1 NN4 00001	First Innuation Data of
Lease Number NM-03381	Field Inspection Date <u>n/a</u>

The following stipulations will apply to this well unless a particular Surface Managing Agency or private surface owner has supplied to BLM and the operator a contradictory environmental stipulation. The failure of the operator to comply with these requirements may result in the assessments or penalties pursuant to 43 CFR 3163.1 or 3163.2. A copy of these conditions of approval shall be present on the location during construction, drilling and reclamation activity.

An agreement between operator and fee land owner will take precedence over BLM surface stipulations unless (In reference to 43 CFR Part 3160) 1) BLM determines that operator's actions will affect adjacent Federal or Indian surface, or 2) operator does not maintain well area and lease premises in a workmanlike manner with due regard for safety, conservation and appearance, or 3) no such agreement exists, or 4) in the event of well abandonment, minimal Federal restoration requirements will be required.

- 1. Pits will be fenced during work-over operation.
- 2. All disturbance will be kept on existing pad.
- 3. Empty and reclaim pit after work completed.

STATE OF NEW MEXICO ENERGY AND MINERALS DEPARTMENT OIL CONSERVATION DIVISION

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION DIVISION FOR THE PURPOSE OF CONSIDERING:

CASE NO. 6443 Order No. R-5926

APPLICATION OF CAULKINS OIL COMPANY FOR A DUAL COMPLETION AND DOWNHOLE COMMINGLING, RIO ARRIBA COUNTY, NEW MEXICO.

ORDER OF THE DIVISION

BY THE DIVISION:

This cause came on for hearing at 9 a.m. on January 31, 1979, at Santa Fe, New Mexico, before Examiner Richard L. Stamets.

NOW, on this 20th day of February, 1979, the Division Director, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

FINDS:

- (1) That due public notice having been given as required by law, the Division has jurisdiction of this cause and the subject matter thereof.
- (2) That the applicant, Caulkins Oil Company, seeks authority to complete its Breech B Well No. 220-R, located in Unit B of Section 14, Township 26 North, Range 7 West, NMPM, Rio Arriba County, New Mexico, as a dual completion (conventional) to produce gas from the Dakota formation through one string of tubing and to produce commingled Pictured Cliffs, Chacra and Mesaverde gas production through a second string of tubing.
- (3) That from each of the zones proposed to be commingled, the subject well is expected to be capable of low marginal production only.
- (4) That the proposed commingling may result in the recovery of additional hydrocarbons from each of the subject pools, thereby preventing waste, and will not violate correlative rights.

- (5) That the reservoir characteristics of each of the subject zones are such that underground waste would not be caused by the proposed commingling provided that the well is not shut-in for an extended period.
- (6) That to afford the Division the opportunity to assess the potential for waste and to expeditiously order appropriate remedial action, the operator should notify the Aztec district office of the Division of the pressure and productivity encountered upon completion and to further notify said district office any time the subject well is shut-in for 7 consecutive days.
- (7) That in order to allocate the commingled production to each of the commingled zones in the subject well, 50 percent of the commingled gas production should be allocated to the Pictured Cliffs zone, 20 percent of the commingled gas production to the Chacra zone, and 30 percent of the commingled gas production and all of the condensate production to the Mesaverde zone.
- (8) That the Director of the Division should be authorized to rescind the commingling authority granted by this order whenever it appears that waste would be prevented thereby.
- (9) That the mechanics of the proposed dual completion are feasible and in accord with good conservation practices.
- (10) That approval of the subject application will prevent waste and protect correlative rights.

IT IS THEREFCRE ORDERED:

(1) That the applicant, Caulkins Oil Company, is hereby authorized to complete its Breech B Well No. 220-R, located in Unit B of Section 14, Township 26 North, Range 7 West, NMPM, Rio Arriba County, New Mexico, as a dual completion (conventional) to produce gas from the Dakota formation through one string of tubing and to produce Pictured Cliffs, Chacra and Mesaverde gas production, hereby authorized to be commingled in the wellbore, through a second string of tubing with separation of the Dakota zone from the other zones achieved by means of a packer set at approximately 5100 feet.

PROVIDED HOWEVER, that the applicant shall complete, operate, and produce said well in accordance with the provisions of Rule 112-A of the Division Rules and Regulations insofar as said rule is not inconsistent with this order;

PROVIDED FURTHER, that the applicant shall take packer leakage tests upon completion and annually thereafter during the Annual Deliverability Test Period for gas wells in Northwest New Mexico.

- (2) That 50 percent of the commingled gas production shall be allocated to the Pictured Cliffs zone, 20 percent of the commingled gas production shall be allocated to the Chacra zone, and 30 percent of the commingled gas production and all of the condensate production shall be allocated to the Mesaverde zone.
- (3) That the operator of the subject well shall immediately notify the Division's Aztec district office any time the well has been shut-in for 7 consecutive days and shall concurrently present, to the Division, a plan for remedial action.
- (4) That the applicant shall immediately advise the Division's Aztec district office of the pressure and potential of the commingled zones.
- (5) That the Director of the Division may rescind the authority to commingle granted by this order if it appears that waste will be prevented thereby.
- (6) That jurisdiction of this cause is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

STATE OF NEW MEXICO

OIL CONSERVATION DIVISION

JOE D. RAMEY

Director
