Re: Lively #17
P Section 1, T-26-N, R-8-W
30-045-21325

Gentlemen:

Attached is a copy of the allocation for the subject well that was recompleted 11-15-02. DHC-2793 was issued for this well.

Gas:	Chacra	71%
	Mesaverde	2%
	Dakota	27%

Oil:	Chacra	0%
	Mesaverde	0%
	Dakota	100%

These percentages are based upon reserves assigned to each formation founded on production from the respective formations before and after work over operations and separator tests completed on the Chacra and Mesaverde formations during recompletion. The Chacra formation does not produce any oil; and the Mesaverde test did not show any traces of oil, therefore, oil percentages are allocated solely to the Dakota formation.

Please let me know if you have any questions.

Sincerely,

Peggy Cole
Regulatory Supervisor
