Mr. Wayne Roberts  
Plains Pipeline LP  
6 Desta Drive  
Midland, TX 79705

Dear Mr. Roberts:

Based on your responses given in the "Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit" and a file review, the Oil Conservation Division (OCD) has determined that several of your facilities with an expired or soon to be expired permit do not require a Water Quality Control Commission (WQCC) Discharge Permit. This means that WQCC Discharge Permits **GW-294 (Plains Pipeline LP - TNM 97-04 Townsend)**, **GW-289 (Plains Pipeline LP - Loco Hills Crude Pump Station)**, **GW-351 (Plains Pipeline LP - Lea Crude Pump Station)**, and **GW-380 (Plains Pipeline LP - Plains Hobbs Station)** are hereby terminated and you are not required to proceed with the renewal of these expired or soon to expire WQCC Discharge Permit. OCD will close these permits in its database.

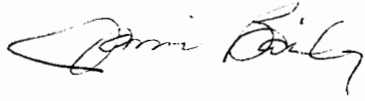

Because these WQCC Discharge Permits are no longer valid, you may be required to obtain a separate permit(s) for other processes at your facility, such as: pits, ponds, impoundments, below-grade tanks; waste treatment, storage and disposal operations; and landfarms and landfills. OCD will make an inspection of your facility to determine if any of these existing processes may require a separate permit under OCD's Oil, Gas, and Geothermal regulations. If OCD determines that a separate permit(s) is required, then a letter will be sent to you indicating what type of permit is required.

Please keep in mind, if your facility has any discharges that would require a WQCC Discharge Permit now or in the future, then you will be required to renew or obtain a WQCC Discharge Permit. If you have any questions regarding this matter, please contact Glenn von Gonten at 505-476-3488.

## Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit

Only Water Quality Control Commission- regulated systems will be incorporated into the OCD's WQCC Permits, while OCD regulated systems will be handled under separate permit(s). A current discharge permit is valid until its normal expiration date or November 15, 2012, whichever is later. All facilities with processes subject to the Water Quality Act must have permits in place by November 16, 2012. H2S Contingency Plans; pits, ponds, above and/or below-grade tanks; waste treatment, storage and disposal; and landfarms and landfills may require separate permitting under the OCD Oil, Gas, and Geothermal regulations.

*Proper completion and timely submission of this questionnaire is requested for all facilities with discharge permit expiration dates before November 15, 2012. Please complete and submit a separate questionnaire for each facility before July 15, 2011.*

### • Name of the owner or operator of the facility

Plains Pipeline, L.P.

### • Point of contact

Name: Wayne E. Roberts

Telephone: (432) 687-8915

Email: weroberts@paalp.com

Mailing address: # 6 Desta Drive

Midland, TX 79705

### • Facility name: Lea Crude Pump Station

### • Facility location

Unit Letter, Section, Township, Range: "F"; Section 28; T-20-S; R-37-E; NMPM

Street address (if any)

### • Facility type

☐ Refinery

☒ Crude Oil Pump Station

☐ Geothermal

☐ Other (describe)

☐ Gas Plant

☐ Injection Well

☐ Abatement

☐ Compressor

☐ Service Company

### • Current and Past Operations (please check all that apply)

☐ Impoundments

☐ Disposal Well

☐ Treatment Plant

☐ Brine Well

☐ Water flood

☐ Wash Bay

☐ Steam Cleaning

☒ Groundwater Remediation

• **Facility Status**      ☒ Active      ☐ Idle      ☐ Closed

• **Does this facility currently have a discharge permit?**   ☒ Yes      ☐ No

If so, what is the permit number? GW-351-0

• **Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface or ground water?**

(This includes process activities, equipment maintenance, or the cleanup of historic spills.)

☐ Yes      ☒ No

If so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.

---

---

---

---

---

• **What is the depth below surface to shallowest ground water in the area?** 68.83'

• **Are there any water supply, groundwater monitoring, or recovery wells at the facility?**

Water supply ☐      Monitoring ☒      Recovery ☒

If these wells are registered with the Office of the State Engineer (OSE), what are the OSE well numbers? \_\_\_\_\_

• **Are abatement actions ongoing?** Yes

• **Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility?** ☐ Yes      ☒ No

If so, what are the API numbers assigned to those wells?

---

---

• **Are there any sumps at the facility?**      ☐ Yes      ☒ No

Number of sumps with volume less than 500 gallons \_\_\_\_\_

Use and contents \_\_\_\_\_

Is secondary containment incorporated into the design?      ☐ Yes      ☐ No

Number of sumps with volume greater than 500 gallons \_\_\_\_\_

Use and contents \_\_\_\_\_

Is secondary containment incorporated into the design?      ☐ Yes      ☐ No

- Does the facility incorporate any underground lines other than electrical conduits, freshwater, natural gas for heating, or sanitary sewers? ☐ Yes ☒ No

If so, what do those buried lines contain?

**December 7, 2012**

Mr. Wayne Roberts  
3705 E. Hwy 158  
Midland TX 77210

Dear Mr. Roberts:

The Oil Conservation Division's (OCD) records indicate that the following Water Quality Control Commission (WQCC) Discharge Permit has already expired or will soon expire.

<b>GW-351</b>	<b>Lea Crude Station</b>
<b>GW-294</b>	<b>TNM 97-04 Townsend Crude Pipeline</b>
<b>GW-380</b>	<b>Plains Hobbs Station</b>
<b>GW-289</b>	<b>Loco Hills Pump Station</b>

OCD has revised its permitting policies. These changes may affect the renewal of your discharge permit(s). Please submit an "Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit" for each of your facilities (see attachment and OCD's "Notifications and Announcements" at <http://www.emnrd.state.nm.us/ocd>). Please submit the completed Questionnaires within 30 days of your receipt of this letter. Based on your response, OCD will determine whether you will need to submit a discharge permit renewal. If OCD determines that you no longer are required to operate under a WQCC Discharge Permit, you may be required to obtain a separate permit(s) for other processes at your facility, such as: pits, ponds, impoundments, below-grade tanks; waste treatment, storage and disposal operations; and landfarms and landfills. OCD will determine if any of these existing processes may require a separate permit under OCD's Oil, Gas, and Geothermal regulations. If OCD determines that a separate permit(s) is required, then a letter will be sent to you indicating what type of permit is required.

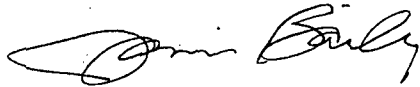

Please keep in mind, if your facility has any discharges that would require a WQCC Discharge Permit now or in the future, then you will be required to renew or obtain a WQCC Discharge Permit.

If you have any questions regarding this matter, please contact Glenn von Gonten at 505-476-3488.
