RE: Application for Unorthodox Well Location  
Jicarilla A No. 3N (API No. N/A)  
1164' FNL & 2548' FWL (Unit C)  
Section 19, T-26 North, R-5 West, NMPM,  
Rio Arriba County, New Mexico

Dear Ms. Bailey,

Pursuant to Division Rule 19.15.15.13, Enervest Operating, LLC ("Enervest") respectfully requests administrative approval of an unorthodox gas well location for its proposed Jicarilla A No. 3N. This well will be drilled as a development gas well in the Blanco-Mesaverde (Prorated Gas-72319) and Basin-Dakota (Prorated Gas-71599) Gas Pools at an unorthodox location for both pools 1164 feet from the North line and 2548 feet from the West line (Unit C) of Section 19, Township 26 North, Range 5 West, NMPM, Rio Arriba County, New Mexico.

The proposed Jicarilla A No. 3N will be dedicated to existing 320-acre gas spacing and proration units in both the Blanco-Mesaverde and Basin-Dakota Gas Pools comprising the W/2 of Section 19. In the Blanco-Mesaverde Gas Pool, this unit is currently dedicated to Enervest's existing Jicarilla A No. 4M (API No. 30-039-29928) located at an unorthodox well location 1780 feet from the South line and 580 feet from the West line (Unit L). The Jicarilla A No. 3N will be the first infill well on this unit. In the Basin-Dakota Gas Pool, this unit is currently dedicated to Enervest's existing: i) Jicarilla A No. 4M (described above); ii) Jicarilla A No. 4E (30-039-22292) located at a standard well location 950 feet from the North line and 1075 feet from the West line (Unit D); and iii) Jicarilla A No. 4 (API No. 30-039-08062) located at a standard well location 1850 feet from the South and West lines (Unit K). The Jicarilla A No. 3N will be the third infill well on this unit.

Both the Blanco-Mesaverde and Basin-Dakota Gas Pools are currently governed by special rules established by Order No. R-10987, as amended. Pursuant to these rules, wells are to be located no closer than 660 feet to the outer boundary of the spacing unit nor closer than 10 feet to any quarter-quarter section line or subdivision inner boundary. These rules also allow the drilling of up to four wells within a standard spacing unit provided that no more than

two wells may be drilled within a quarter section, and further provided that no more than one well may be drilled within a quarter-quarter section.

The attached map shows that the proposed unorthodox location is necessary due to surface topography in this area.

The affected offset acreage is the E/2 of Section 19 in both the Blanco-Mesaverde and Basin-Dakota Gas Pools. The E/2 of Section 19 is an existing 320-acre spacing and proration unit in both the Blanco-Mesaverde and Basin-Dakota Gas Pools, and both units are operated by Enervest. Please note that the working interest ownership between the W/2 and the E/2 of Section 19 is common. Consequently, notice of this application is not required to be provided to any party.

Attached are C-102 forms for both the Blanco-Mesaverde and Basin-Dakota Gas Pools showing the proposed well, spacing unit, other existing wells in the spacing unit and the affected offset acreage. Also attached is a topographic map.

In summary, approval of the application will provide Enervest the opportunity to recover additional oil and gas reserves from the Blanco-Mesaverde and Basin-Dakota Gas Pools underlying the W/2 of Section 19 that may otherwise not be recovered by the existing wells, thereby preventing waste, and will not violate correlative rights.

If you should have any questions, please call me at (505) 690-9453.

Sincerely,

David Catanach
