Two small holes were found in the side of the oil tank and one small hole was found in the produced water tank inside the Mongo 25 Federal Com #2 Tank Battery allowing the release of fluid. The tanks will be repaired or replaced.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 50bbls of produced fluid were released and we were able to recover 48bbls with a vacuum truck. All fluid that was released was contained inside the lined facility. All free fluid has been recovered and the tanks have been cleaned. Stained gravel has been removed from the facility and replaced with fresh gravel as needed. This facility has been returned to its prior condition.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
