Will,

This well is outside of the unit. It also goes through the Capitan Reef and there is only one casing and one cement barrier. The BLM would have required four casing strings in this area.

I have not finished my review, but I would think a monitoring system should be required since the proposal has only three casing strings.

Sincerely,

Will,

Attached is the Affidavit of Publication for the above well for the Devonian/Silurian/Ordovician injection zone. Please let me know if you need anything else on either of the applications for the BFDU SWD 1: Delaware or Devonian. ☺

Hope you are having a good week! ☺
