If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
The circulating line on the 500 Bbl. oil production tank failed due to corrosion. The line and the tank were replaced.

Describe Area Affected and Cleanup Action Taken.\* The entire surface area of the earthen containment around the production tanks was affected by the release. The area measures approximately 3000 sq. ft. No remediation activities have taken place, new gravel was placed over the spill area inside the containment area. The affected area will be remediated in accordance to the NMOCD guidelines, the tank battery will be evaluated for re-construction inside impervious containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
