NATURE OF RELEASE

Type of Release	Produced water	Volume of Release	300 bbls	Volume Recovered	0 bbls
Source of Release	Power failure/ Tank overflow	Date and Hour of Occurrence	04/22/2013	Date and Hour of Discovery	
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	James Amos-BLM and Mike Bratcher-OCD		
By Whom?	Chancey Summers	Date and Hour	04/22/2013 @ 11:03 am		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A power failure at the site caused 300 bbls of produced water to leak onto the ground. No fluids were recovered and the power was restored to the site.

Describe Area Affected and Cleanup Action Taken.*
The area affected is 400' x 100'. A power failure at the site caused 300 bbls of produced water to leak onto the ground. No fluids were recovered and the power was restored to the site. Remediation will be performed in accordance with an approved plan from the NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: SAND DUNES 28 FEDERAL 1 SWD BATTERY

This is to inform you that Oxy Permian Primary NM South had a leak on the Sand Dunes 28 Federal 1 SWD on April 22, 2013. Oxy released 300 bbls due to power failure at the facility causing the transfer pumps to go down letting the tanks overfill. Most of the fluid was contained in the firewall, however a small amount did leave location. Oxy is currently waiting on trucks to start recovery operations. Oxy will do some initial remediation. C-141 to follow. BBC will delineate at a later date. If you have any questions let me know. Driving directions: Off of Highway 128 go South on Pure Gold Road take 4th road to SWD battery.

Thank You
