RECEIVED
JUL 22 2013
NMOCD ARTESIA

Power switched off on transfer pump caused water storage tank to overflow. Vacuumed up spill inside berm.

Spill was confined inside battery firewall berm area. Operator has contacted Basin Environmental to evaluate and remediate contamination.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Joe,

I have been out for a few days, but did notice we have received a hard copy also.

Thank you,

Mike Bratcher

Subject: Spill report July 6, 2013 Littlefield BO Battery

Mike,

Please find attached a C-141 for the release described in your LOV dated 15 July 2013. I've notified Jim Amos by phone this morning. As noted in the C-141, I've forwarded the LOV to Joel Lowry at Basin environmental and asked them to do the plan and site remediation. They are quite busy and if anything changes I'll let you and Jim know.

Anything else, let me know.

Regards,

Joe Compton
