NATURE OF RELEASE

Type of Release	Natural Gas, H2S Contaminated	Volume of Release	3495 MCF	Volume Recovered	0
Source of Release		Date and Hour of Occurrence	02-22-2013 09:55 MST	Date and Hour of Discovery	02-22-2013 10:30 MST
Purge activities to clear H2S from line.		If YES, To Whom?	Randy Dade via Telephone		
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required				
By Whom?	Jim Heap	Date and Hour	02-23-2013 08:45 MST		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A third-party well connected to the Enterprise Gathering system introduced high H2S gas to the system. To eliminate this gas, the gathering lines needed to be purged. Volume includes the gathering line and station residual volumes.

Describe Area Affected and Cleanup Action Taken.*

Line was purged to reduce the H2S level at the South Carlsbad Compressor Station below the permitted limit of 4 ppm.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**RE: Form C-141 Report
Trunk A Separator Blow-down for H2S Purge**

Mr. Bratcher

Enclosed, please find the requisite C-141 Form for the blow-down on our Trunk A gathering line on February 22, 2013. Our South Carlsbad Compressor Station experienced an increase in sour gas that required purging. Emissions were released from the nearby Trunk A gathering line vent and include both the line volume and the station volume.

This is sent pursuant to 29 (19.15.29) NMAC and as follow-up to verbal notification made to Randy Dade on February 22, 2013.

If you have any questions or need more information, please contact Jim Heap by phone at 432-686-5404, by email at jkheap@eprod.com or me at 713-318-6684

Regards,

Matthew E. Marra,
Senior Director, Environmental
