Chase,

The area of impact has been cleared as far as archaeology goes. The area appears to have had previous disturbance due to reserve pit reclamation (outside edge of the pit). You are authorized to remove saturated soils ASAP to facilitate/deter any additional migration. Any additional disturbance should have prior approval based on analyticals. Duncan Whitlock (with the BLM) will be the primary point of contact in dealing with any of YPC spill events, be sure to CC myself, as I will cover in his absence (this will be the case for the next 2 weeks). If any questions and/or concerns, please get back to me.

Thanks,

Jim Amos- Bureau of Land Management,

The release that occurred at the Llama ALL Federal Battery #1 on 01/04/2014 breached the location and flowed NW of the berm into the pasture. Attached is a sketch of the area affected by the release with measurements of the area to be remediated if there are no archeological study issues to prevent remediation. A One Call has been submitted and we would like to begin excavation, back dragging as soon as the One Call clears next week if there are no issues that would prevent remediation.

Thanks,

Chase Settle
