RECEIVED

MAR 27 2014

NMOCD ARTESIA

Describe Cause of Problem and Remedial Action Taken.*

A rupture in a gas line caused a fire that melted several poly lines releasing oil and produced water over 9,274 square feet of pasture land. None of this fluid was recovered. The lines were shut down and repaired.

Describe Area Affected and Cleanup Action Taken.*

The site will be assessed and then remediated to NMOCD and BLM regulations.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good Morning Laura,

I received this email from the OCD this morning requesting additional information. Can you please respond to their request?

Also – please copy me on anything that is filed with the OCD or BLM for Burnett Oil and any correspondence regarding any events in our field.

Thank you.

Subject: Spill report information

Ms. Garvis,

I am writing you in reference to a number of C-141 spill reports we have received from you, the Gissler A 46 (12/17/13), Jackson B-5 Gas Line (3/24/14), and the Gissler B 2 Battery (12/22/13). On all three of these reports you indicate both oil and produced water was spilled, but the volume of released fluid is not broken down. We need you to provide a detailed breakdown of both the released and recovered fluids, how much was oil and how much was produced water. This information is necessary for our records. Also, on the Gissler B 2 Battery spill report the volume of release is listed as "minimal spray". I will need an amount in order to process this report.

Thank you,

Heather Patterson
