COG Operating  
High Lonesome Penrose Tank Battery  
Section 15, Township 16 South, Range 29 East  
32.923067 104.058967  
Eddy County, New Mexico

Mike and Terry,

Tetra Tech is preparing to start the soil remediation on the above reference site on Wednesday (10-19-11). The excavation equipment will be moved onsite on Wednesday and the lines near the proposed excavation areas will be hand spotted in the morning. The proposed excavation will either start in the afternoon or Thursday morning. The soil remediation will be performed according to the submitted work plan. Tetra Tech will also notify you during each phase of the remediation project for inspection of the site. We will notify you on any schedule changes or delays on the project. Let me know if you need additional information, thanks

Mike and Terry,

Please find the enclosed Work Plan for the COG - High Lonesome Tank Battery located in Eddy County, New Mexico. The work plan includes the soil assessment and recommendations for the remediation for the site. Due to the limited groundwater data in the area, Tetra Tech installed a temporary well to establish depth to groundwater for the area. The temporary well was installed in Section 14 at the COG - East High Lonesome Tank Battery site. The well was installed to a total depth of 220' below surface and found no measureable groundwater (dry) in the well. The groundwater information is included in the attached work plan. I will mail you a hard copy of the work plan for your files. Once approved, Tetra Tech will schedule the soil remediation and notify you before we start. Please let me know if you need additional information or call me if you have any questions, thanks
