NATURE OF RELEASE

Type of Release:	Crude oil and produced water	Volume of Release	10 bbls crude oil and 50 bbls produced water	Volume Recovered	None
Source of Release:	3" water transfer poly line	Date and Hour of Occurrence	9-9-13, time unknown	Date and Hour of Discovery:	9-9-13 time 9:00 a.m.
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? NMOCD emergency #104			
By Whom?	Tony Savoie	Date and Hour:			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			
If a Watercourse was Impacted, Describe Fully.*					

Describe Cause of Problem and Remedial Action Taken:

The 3" poly line failed at a welded connection. The pump was not running at the time of discovery, produced water was gravitating from the tank onto the ground outside the tank containment area, the tank valve was closed and the line was repaired.

Describe Area Affected and Cleanup Action Taken.* Approximately 3,334 sq. ft. of pasture and approximately 1,162 sq. ft. of road was affected by the release. All of the fluid had soaked into the ground. A one-call will be placed and the saturated soil will be scraped up and stockpiled on-site. A remediation plan will be submitted to the NMOCD.

Remediation activities conducted at the PLU #140 Tank Battery Remediation Site met the objectives set forth by the NMOCD. Confirmation soil samples were submitted to an NMOCD-approved laboratory. The final dimensions of the primary excavation on the southeast side of the containment area were approximately thirty feet (30') in width, thirty-five feet (35') in length and three and one-half feet (3.5') in depth. Approximately four hundred feet (400') of a narrow flowpath traveling north from the well pad along the caliche access road was excavated to approximately three feet (3') bgs. Between December 2 and 13, 2013, approximately 600 cy of impacted soil was excavated and transported to an NMOCD-approved disposal facility. **Please reference the attached Basin Environmental Services Technologies Remediation Summary and Site Closure Request for details of remediation activities.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
