Describe Area Affected and Cleanup Action Taken.\*

**On May 12, 2014 the lease operator was doing his daily lease check and upon arrival he found about fifteen barrels of produced water had spilled to the ground. Lease operator said it happened sometime during the night. It was determined that packing from the jet pump was blown out of the pump causing produced water to overflow to the ground. The lease operator shut the pump off and called the assistant foreman that was in charge. Gandy was called at 9:30 am for vacuum services, a Weatherford representative was notified at 9:41am and Custom Welding was called at 9:43 am, for backhoe services. The BLM and the OCD was notified on May 13, 2014 at 7:31 am and 7:49 am respectively. The size of the spill area was about 150 feet by 60 feet. Approximately 10bbls were recovered from the ground.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
