If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The tank overflowed because the automation was down so the transfer pump did not operate. A total of 220 bbls of oil was released and a total of 180 bbls was recovered. The tanks were equalized when switched to the other pump.

Describe Area Affected and Cleanup Action Taken.\*

A total of 5,050 sq ft of area inside the bermed facility was affected. Initial sampling was conducted at the site on 5/10/13 and surface samples were taken to a commercial laboratory for analysis. The release area was scraped down 6 inches. The site will be delineated for further action.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
