\*Describe Cause of Problem and Remedial Action Taken.\*

Gasket failed on heater treater due to corrosion. Replaced gasket to prevent future spills.

**RECEIVED**

\*Describe Area Affected and Cleanup Action Taken.\*

Initially an estimated 3 bbls of oil and 10 bbls of produced water were released from a failed gasket on a heater treater. None of the fluid was recovered. Tetra Tech inspected site and collected samples to define spills extent. Soil that exceeded RRAL was removed and hauled away for proper disposal. Site was then brought up to surface grade with clean backfill material. Tetra Tech prepared closure report and submitted to NMOCD for review.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
