If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* Hole in bottom of heater inside base ring. All fluid in dike area picked up with vacuum truck emptied in heater. Cause degradation.

Describe Area Affected and Cleanup Action Taken.* A total of 31 sq ft of the lined, bermed area surrounding the heater was affected. RECS personnel arrived on site on September 10th, 2013. The site was photographed and mapped. The liner was found across the base of the heater and none of the release occurred outside the liner. The contaminated caliche above the liner was removed and taken to a NMOCD approved facility for disposal. Clean caliche was imported to the site to replace the contaminated caliche.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
