Describe Cause of Problem and Remedial Action Taken.* Leak was on the header section on the east side of Cotton Draw Unit 65 Salt Water Disposal battery where the Cotton Draw Unit 86 water ties in. The line had been isolated but was opened on 8-14-14 to perform flowback to the Cotton Draw Unit 86. The leak was on a 4" steel section of pipe where the exposed threads were corroded. ON 8-15-15 the line was isolated and a vacuum truck was called out to recover the spilled water. The corroded section of pipe has been replaced.		
Describe Area Affected and Cleanup Action Taken.* Vacuum truck recovered 10BBLS of produced water spilled. Area affected was approximately 200'x15' on the caliche pad. The produced water flow headed south about 30' and turned west approximately 200'. The leak appeared to be approximately 20' wide at the greatest area. Talon LPE will be collecting soil samples to determine the specific cleanup remedies necessary.		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
