**NM OIL CONSERVATION**

Describe Cause of Problem and Remedial Action Taken.\*

ARTESIA DISTRICT

A gasket on a FWKO failed. Replaced the gasket to prevent reoccurrence.

AUG 29 2014

Describe Area Affected and Cleanup Action Taken.\*

RECEIVED

Initially an estimated 15 bbls of oil and 25 bbls of produced water were released from a failed gasket on a FWKO. None of the fluids were recovered. The spill area is on the location and overspray on the adjacent pasture. Tetra Tech inspected site and collected samples to define spills extent. Soil that exceeded RRAL was removed and hauled away for proper disposal. Site was then brought up to surface grade with clean backfill material. Tetra Tech prepared closure report and submitted to NMOCD for review.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
