Describe Cause of Problem and Remedial Action Taken.* A hole developed in the 4" line going to the scrubber inside the BC Federal #10 Tank Battery. An emergency clamp has been installed on the line as a temporary repair.		
Describe Area Affected and Cleanup Action Taken.* Tetra Tech inspected site and collected samples to define spill extents. In the areas of AH-2 and AH-3, soils that exceeded RRAL were treated in-situ for the degradation of the impacted soils. Tetra Tech collected confirmation samples to confirm the soils were below the RRAL. Once below the RRAL, Tetra Tech prepared closure report and submitted to NMOCD for review.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
