Describe Cause of Problem and Remedial Action Taken.\*

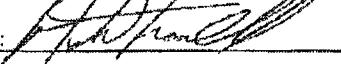

The failure of a transfer pump overload button caused 1 bbl of oil and 131 bbls of produced water to spill onto the ground. A total of 130 bbls of fluid were recovered via vacuum truck and the overload button was reset or replaced.

Describe Area Affected and Cleanup Action Taken.\*

The affected area approximately 30' x 60' on location inside the containment. Remediation will be performed in accordance with a remediation plan approved by NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
