A faulty check valve on the water transfer pump caused 200 bbls of produced water to leak onto the ground. 180 bbls of produced water were recovered via vacuum truck and the valve was repaired.					
Describe Area Affected and Cleanup Action Taken.*					
A faulty check valve on the water transfer pump caused 200 bbls of produced water to leak onto the ground. 180 bbls of produced water were recovered via vacuum truck and the valve was repaired. Remediation was completed in accordance with the remediation plan approved by Tomas Oberding of NMOCD via email on 08/11/2014 and approved by Jennifer Van Curen of the BLM in a meeting.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
