| Was a Watercourse Reached?  | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No                                       | If YES, Volume Impacting the Watercourse. |                        |                            |        |

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Excess pressure on a check valve on a 3" steel production flow line caused 20 bbls of produced water to leak onto the ground. A vacuum truck recovered 3 bbls of produced water and the issue was resolved.

Describe Area Affected and Cleanup Action Taken.\*

The affected area is approximately 25' x 70' about 5 feet from the well head on location. Remediation was completed in accordance with the remediation plan approved by Tomas Oberding of NMOCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
