	NATURE OF RELEASE												
Type of Release: Natural gas and possible associated liquids Source of Release: Natural gas gathering pipeline										me Recovered: To be determined and Hour of Discovery: 11/08/13 at			
							Unknown approx			mately 1:30 PM			
Was Immediate Notice Given?  ☐ Yes ☐ No ☒ Not Required							Whom?						
By Whom?							Date and Hour						
Was a Watercourse Reached?  ☐ Yes ☒ No							If YES, Volume Impacting the Watercourse.						
If a Watercourse was Impacted, Describe Fully.*						L				RCVD JA OIL CONS			
										DIST		ក់ <b>ត</b>	
Describe Cause of Problem and Remedial Action Taken.*  Area technician discovered a pipeline leak on the well tie line for the Cohn 29-10-25 #1. The line was isolated, depressurized and LOTO was applied.  Repairs for the line were completed the week of December 2, 2013.													
Describe Area Affected and Cleanup Action Taken.*  Third party environmental contractor attempted to delineate the release area using a hand auger. All soil borings were terminated at two feet below ground (bgs) surface due to auger refusal. The area affected is approximately 50 feet long by 20 feet wide. The pipeline was repaired and additional soil was excavated. Soil samples were collected from the excavation side walls and based on laboratory analysis and the anticipated shallow depth of groundwater indicated potential impacts to groundwater. Additional excavation of impacted soils is being scheduled.
