NATURE OF RELEASE

Type of Release: Spill	Volume of Release: 15 BBLS	Volume Recovered: 13 BBLS
Source of Release: 500 BBL tank	Date and Hour of Occurrence 10/11/13 9:45 pm	Date and Hour of Discovery SAME
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Geoffrey Leking	
By Whom? David May	Date and Hour: 10/14/13 10:30 am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.*
Spill was caused by a piece of rubber lodging inside of disposal pump causing it to lock down. MSO Shut in lease and other incoming fluids.

Describe Area Affected and Cleanup Action Taken.* The release affected a total of 1,965 square feet of diked containment area. RECS personnel were on site beginning on January 8th, 2014 to assess the release. Three points within the release were hand augered to 1.5 ft. Based on the initial sampling, the area was scraped to 1 ft bgs and 15 cubic yards of contaminated soil was taken to a NMOCD approved facility for disposal. A final five point composite sample was taken at the base of the scrape and sent to a commercial laboratory for analysis. Base coarse caliche was imported to the site to serve as backfill. A composite sample from the imported base coarse caliche was taken to a commercial laboratory for analysis. The imported base coarse caliche returned a laboratory chloride reading of 48 mg/kg. On August 7th, 2014, RECS requested permission to backfill the site from NMOCD. NMOCD approved the site to be backfilled on August 8th, 2014. The remainder of the contamination will be remediated as site abandonment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
