accordance with 19.15.29 NMAC. District IV 1220 S. St. Francis Dr., Santa Fe, NM 87505 Santa Fe, NM 87505 Release Notification and Corrective Action **OPERATOR** Initial Report ☐ Final Report Name of Company: Gibson Energy Contact: Bridget Sedlack Address: 3819 Towne Crossing, Ste 100 Mesquite, TX 75150 Telephone No.: 214-461-5563 Facility Name: Iron House 19 State #1 Facility Type: CTB Surface Owner: State Mineral Owner: API No.: 30-025-40676 LOCATION OF RELEASE Unit Letter North/South Line Township Feet from the Feet from the East/West Line Section Range County: LEA N 19 **18**S 35E 200' South 1800' West Latitude 32.7266 W Longitude -103.49970 W NATURE OF RELEASE Type of Release: OIL Volume of Release: 19 bbls Volume Recovered: 5 bbls Source of Release: Overflow Transport Truck Date and Hour of Occurrence: Date and Hour of Discovery: 11/9/2014 11/9/2014; 4:00 pm 4:00 pm Was Immediate Notice Given? If YES, To Whom? Yes No Not Required NMOCD Hobbs District I Date and Hour By Whom? Was a Watercourse Reached? If YES, Volume Impacting the Watercourse. ☐ Yes 🔀 No If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* The transport driver overflowed his truck while loading out oil causing a release of 19 barrols of oil. A vac truck responded same day and recovered 5 barrels of oil. Talon made an emergency One Call with NM 811 to start remedial activities.

Describe Area Affected and Cleanup Action Taken.* The area affected from this release measured approximately 74-feet long by 40-feet wide. Talon mobilized personnel and equipment to the location and the visually impacted area was initially excayated between 0.5-feet to 1.5-feet deep where we encountered a rock shelf in the vicinity of sample location S-I under the load-outs and towards the pump jack. The area in the vicinity of sample location S-2 was excavated to a depth of 0.5-feet which rock was also encountered. The contaminated soil at S-3 was excavated to a depth of 1.5-fect deep. The contaminated soll was transported to Lea Land, LLC. Confirmation soll sampling was completed on 11/17/2014 and delivered to Cardinal Labs the same day for rush analysis. The lab results are attached along with a site map. The soil testing results are under the Recommended Remedial Action Levels (RRAL's). No further actions are required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have falled to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other

federal, state, or local laws and/or regulations.
