If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

On Saturday, January 3, 2015 at 1330 hrs. MST, a spill occurred at the Warren Unit Satellite 5. The spill originated from the transfer pump intake line. All valves were closed to the transfer pump and separator, and the transfer pump power was also disabled at the electrical box. Spill area was 120 ft. x 60 ft. x 1 inch deep for a total of 6.68 BO with none recovered. The spill remained on the caliche pad. The area will be remediated according to NMOCD guidelines.

Describe Area Affected and Cleanup Action Taken.\*

Spill area was 120 ft. x 60 ft. x 1 inch deep for a total of 6.68 BO with none recovered. The spill remained on the caliche pad. The area will be remediated according to NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
