If a Watercourse was Impacted, Describe Fully.* N/A		

**Describe Cause of Problem and Remedial Action Taken.\***

The transfer pump, which moves fluids from gathering battery to SWD well, salted off and tanks ran over. All fluids contained in secondary containment berm.  
Wells producing to gathering battery were shut-in, vac trucks recovered free fluid and pump repairs were made. Plan to install high-level alarms/shutdowns on battery.

**Describe Area Affected and Cleanup Action Taken.\***

All fluid remained in secondary containment berm, 43/50Bbls spilled were recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Attachments:** NM\_BrushyCreekGatheringStation\_InitialC141(011515).pdf

Heather,

Attached please find completed OCD form C-141 for a spill occurring at the RKI operated Brushy Creek Gathering Station in Eddy County, NM. I used the legals for the RKI operated UCBH WW Federal 003 (API # 30-015-24451) as it is on the same pad as the gathering battery. I apologize for the delayed report.

Please feel free to contact myself or a local RKI representative with any questions.

Kind Regards,

Zack Laird | Sr. EHS Manager
